Lancaster Farming

Vol. 17 No. 52 | Lancaster Farming, Saturday, November 18, 1972 | $2.00 Per Year

Lyng Tells Ag-Industry Group . . .

USDA to Stay, Subsidies to Go

Richard E. Lyng, assistant secretary of agriculture for the U.S., said that the USDA was in no imminent danger of being dissolved, but that huge subsidy payments to large scale farmers were most likely on the way out. He spoke here on Thursday night to a capacity crowd at the Chamber of Commerce annual agriculture-industry banquet in the Farm and Home Center.

"Legislative reapportionment since 1965 has given farmers less of a voice in Congress. The one man-one vote rule has put more political power in the cities. This complicates the farmers' problems, because city-dwellers don't understand anything about farming."

This was part of the message delivered on Thursday evening by Assistant Secretary Richard E. Lyng, U.S. Department of Agriculture. Lyng spoke at the annual agriculture-industry banquet sponsored by the agriculture committee of the Lancaster Chamber of Commerce. He talked to a capacity crowd in the large banquet room at the Farm and Home Center.

Farmers will continue to have an ally in Washington, however, Lyng said in response to a question from the audience. There had been some speculation earlier this year that the USDA would be disbanded and its work spread out over a number of other government agencies The speculation was sparked by a presidential report which recommended such a rule

"At one time this was a possibility," Lyng admitted, "but the President has changed his mind."

Lyng also hinted that huge subsidy payments now going to large scale farmers will gradually be eliminated. He pointed out that this move wouldn't effect area farmers too much, however, because the bulk of today's subsidy payments are going to cotton growers.

The secretary, however, defended the government's need to pay a farmer not to produce excessive amounts of some farm products.

"With high food prices, why pay farmers not to produce?" he asked Answering his own question, Lyng explained that the alternatives would be for farmers to either produce too much or too little Since underproduction would only lead to hunger, he said the government encourages farmers to produce "just a little too much

"We must provide a way for the farmers to hold back production and still make a living," he said.

Lyng went on to say that if agriculture is to remain a healthy part of the nation there must be

(Continued On Page 4)

Assistant U.S. Secretary of Agriculture Richard E. Lyng, left, spoke here on Thursday night at the annual CofC agriculture-industry banquet. Lyng is shown here with Amos Funk, center, representing agriculture, and George Delp, representing Lancaster County agriculture.

Eggmen Meet Here

Eggmen from around the state as well as some from New York and New Jersey gathered at the Farm and Home Center on Tuesday to discuss the economics of egg pricing.

The day was spent in discussing the reasons for pricing problems, current research aimed at solving the problems, committee pricing, market orders, marketing information, and the work of Egg Clearinghouse.

Resource people attending were: Samuel Berenson, manager and vice-president of Chick Sales Egg Farm in Hanover; Kermit Birth, professor of agricultural economics extension at Penn State; Dr. William Henson, an agricultural economist with the USDA, located at Penn State; Jay Irwin, associate county agent for Lancaster County; Maurice Pickler, producer-distributor from New London, North Carolina and a director of Egg Clearinghouse, Inc.; Kink Souders, Manager of Producers Pride, Coatesville, and a director

(Continued On Page 34)

Bollinger Reelected

Elam Bollinger, Manheim R1, was reelected president of the Lancaster County Holstein Association after that group's annual meeting on Tuesday night at the Good 'N Plenty Restaurant.

Other officers elected during a director's reorganization meeting were: vice-president, Paul Welk, Quarryville, R2; secretary, Vernon Umble, Christiana R1, nd treasurer, Curtis Akers, Quarryville, R1.

During the dinner meeting, members reeelected two directors and picked one new member to serve on the board of directors. Reelected were John Harnish, 1036 Beaver Valley Pike, Lancaster, and Clyde Martin, East Earl R1. Newly elected was Shelley Shellenberger, Mt. Joy, R1.

Over 200 members attended the meeting. Also attending were Donna Book, Lancaster County's dairy princess, William Nichol from the Pennsylvania State Holstein Assoc ation, Carl Brown from the national association, and Elvin Hess, president of the state association.

Garden Spot Agway Holds Annual Meet

Some 325 Agway members from the Garden Spot zone attended that organization's annual meeting on Monday night at the Farm and Home Center.

Reports on operations were given by Mark Hess, store manager for the five Agway stores in the Garden Spot zone. Area manager Arthur Cochran came to the meeting from Harrisburg to report on statewide operations.

Comments were also heard from county extension personnel Max Smith, Jay Irwin and Joan Lucas.

There were four committeemen elected to three-year-terms during the meeting Reelected were Roy H. Book, Ronks R1, and John W Sangrey, Conestoga R2 Newly elected were John R Groff, 37 Quarry Road, Leola, and Donald L Hershey, Manheim R2.

The group was entertained by the Garden Spotters quartet, and there were 25 door prizes awarded.

New York Dressed Meats

Thursday, November 16

Compared with Wednesday, general price structure weak for all fresh meats. Demand only fair and New York wholesalers confronting what appears to be a struggle to clear stocks on hand before close of business Friday. Beef Rounds and Chucks very poor but Ribs active. Heavy fatted meats again posing problem as buyer interests hard to generate.

Steer Beef

Omaha Cattle

Thursday, November 16

Compared to previous week's close, mild early advance on slaughter steers lost in late trading with closing prices barely steady. Instances 25 lower. Heifers closed mostly steady. Cows were 25-50 higher and bulls fully steady. The meager feeder supply was hardly adequate to establish a trend, scattered sales steady to 50 lower on fleshy two-way steers and heifers.

Four day receipts 15,600 as compared 19,000 previous week and 17,600 a year ago. Slaughter steers approximately 37 percent of week's total, heifers 43 percent, cows 8 percent, feeders approximately 10 percent including Friday auction receipts Weather played a dominant role in cattle trade during week under review and sufficient to largely offset the usually bearish trade preceeding the Thanksgiving holiday Severe storm conditions paralyzed livestock movement the forepart of week and buyers were inclined to acquire cattle whenever supplies available in order to meet immediate slaughter requirements. However, any widespread optimism was not supported by the wholesale carcass trade and live prices again pointed downward in late trading. Feedlot conditions suffered more deterioration as a result of wet 8 inch snowfall and many cattle carried a moderate amount of mud.

STEERS· Twenty loads High-Choice and Prime 975-1207 pounds 2-4 33.85-34 00, same grade 1200-1250 mainly yield grade 4 33 75 Choice 975-1250 2-4 closed 32.75-33 75 Mixed Good and Choice 950-1225 32.50-33.00. Good 31 50-32 50, Holsteins 1100-1300 2-3 31.65-32 25 Standard and Low-Good 30 50-31.50.

Average cost slaughter steers first three days 33 34 average weight 1127 pounds as compared 33 63 and 1127 pounds previous week and 33.41 and 1118 pounds a year ago. For first time since December 1970, average cost of steers lower than comparable week a year earlier.

HEIFERS: Thirty-two loads High-Choice and Prime 894-1053 pounds 3-4 33 35-33 75 Choice 850-1025 2-4 closed 32.00-33.00. Mixed Good and Choice 750-975 31.25-32.00 Good 30.00-31 25. Standard and Low-Good 28.50-30.00.

COWS: Utility and Commercial 25.25-26.50, Canner and Cutter 22.00-25 25, Mixed Cutter and Utility 25 50-25.75 Shelly Canner 21.00-22.00

BULLS: Utility, Commercial and Good 29 00-32.50, Commercial 1-2 33.00-34.00. Cutter and Low-Utility 26.00-29 00.

FEEDERS: Outshipments from regular market trading not sufficient to establish an accurate trend, scattered sales steady to 50 lower.

STEERS· Few High-Good and Choice 950-1025 pounds 32.50-33.50

HEIFERS: Two consignments High-Good and Choice 727-877 pounds 32.25-32.50.

Lyng Tells

(Continued From Page 1)

an exchange of dialogue between farm and non-farm groups. The two should be able to agree on several basic facts concerning farming, he said. These would be that a prosperous farming community benefits everyone; and that there must be some government involvement in agriculture.

Mentioning other problems facing agriculture, Lyng touched on pollution controls, farm labor, the Occupational Safety and Health Act, and increased regulation of chemicals used both in food and for farming.

He called for a repeal of the Delaney amendment to the Food and Drug Act. This is the amendment which prohibits any trace, no matter how small, of any known cancer-producing agent, in any human food. Recently, the Food and Drug Administration banned the use of diethylstilbesterol (DES) in cattle feed because traces of the drug had been showing up in steer livers Lyng said increasingly effective detection methods had made the Delaney amendment obsolete.

Lyng pointed out that U.S agriculture has been hailed as one of the wonders of the world. "Three percent of our people produce all the food for our country plus another $10 billion worth of food for export," he said "We can do this here because our agriculture is an industry that uses massive amounts of capital and technology to replace massive amounts of labor"

There were other speakers at the dinner besides Lyng Outgoing Chamber of Commerce president Albert C Wedge talked about the prosperous mixture of agriculture and industry which exists in the county

Three major problems confronting farmers in the county today were outlined by Daniel L Martin, dairy farmer and a member of the chamber's agriculture committee, at the annual Agriculture Industry Banquet Thursday.

Martin said these problems include an inflating economy, which finds the farmers at the tail end; the rapid growth of the Lancaster area, which is a threat to the agricultural community; and the shadow of tax reassessment which could price farmers out of business if they are taxed on the potential use of their land, rather than its agricultural use.

County Agent Max Smith was the last speaker of the evening. He pointed to the constant pressures of urban sprawl, and the toll it takes in county farmland. He then urged the Chamber of Commerce to be as energetic in preserving agriculture here in the next ten years as it has been promoting tourisim in the county and taking land out of farm production in the past ten years.

Dairy Outlook Good for '73

Rising milk prises, a good supply of replacement heifers, and slow decline in dairy cow numbers favor another gain in U S milk production for 1973 and a further boost for cash receipts from dairying according to a report from the USDA's Economic Research Service. Higher ration prices and poor roughage quality in some areas may limit the rise in output next year to about a billion pounds of milk

Milk production increases slowed a little in September, and fourth quarter output is likely to run 1 to 1½ percent above a year earlier This would boost 1972 output to about 120½ billion pounds from 118 6 billion last year

Commercial disappearance of milk in all dairy products probably will increase about 3 percent this year, after holding fairly stable since 1967 A smaller gain about in line with the population increase appears more likely for 1973

Contributing to this year's gain are higher meat prices, increasing incomes, relatively small rises in retail dairy prices, aggressive dairy promotion programs, and the broadened food stamp program.

Sales of cheese and fluid skim and lowfat milk are gaining most. Consumers are also buying more butter, frozen desserts, and cream items.

For the first time since the mid-1950's, per capita comsumption of milk equivalent in all dairy products is rising

Increased commercial demand for milk and dairy products pushed up 1972 farm milk prices, despite larger milk marketings by farmers and no change in dairy supports since April 1971 Farmers will average about $6.05 per 100 pounds for milk this year, up some 3 percent from 1971.

Farm milk prices should continue above year-earlier levels early next year, but after the first quarter they will also depend on the price support level to be determined for the 1973-74 marketing year

Larger milk marketings and somewhat higher prices in prospect for 1973 point to a boost in dairy cash receipts from $7.1 billion in 1972. Farmers will gross alomost 5 percent more from milk and cream marketings this year, but rising production costs are limiting gains in net income.

Wholesale dairy prices are now up seasonally Normal seasonal increases are strengthened this year by the strong demand for dairy products. Retail dairy prices up less the 1 percent from a year earlier in the third quarter, may rise more strongly the rest of this year and early next year.

For all of 1972, retail dairy prices should average about 1½ percent higher than 1971, the smallest rise in 7 years.

Through October this year, CCC sold 8.5 million pounds of butter and 13.3 million pounds of nonfat dry milk back to the domestic industry as the result of increased demand and reduced commercial supplies.

USDA removals of dairy products from the commercial market likely will be down to the equivalent of some 5¾ billion pounds of milk from 7.3 billion pounds in 1971. Milk production is expected to increase more than sales, and removals in 1973 may be somewhat larger than this year

Government stocks of dairy products are below a year earlier Although its butter holdings are ample, CCC has no uncommitted stocks of American cheese or nonfat dry milk.

Commercial stocks of American cheese are up in response to continued strong demand. By year-end, total dairy product stocks may be somewhat under 1971's 5.1 billion pounds milk equivalent.

Imports of dairy products will likely exceed last year's 1.3 billion pounds milk equivalent, but dairy exports probably will be down.

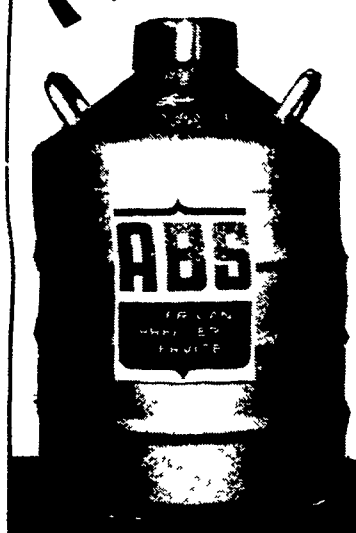
Increasing world milk production is causing a buildup of butter stocks.

Larger world dairy supplies are limiting opportunities for U.S. dairy exports and causing more countries to fill their import quotas to the United States than last year.

By Reservation

There are about 250 Indian reservations in the United States. These areas range in size from tiny settlements in California to the Navajo reservation of more than 15 million acres in Arizona, New Mexico and Utah

The MODERN WAY



One of the modern aspects of cattle improvement is the Direct Herd Program pioneered by ABS, whereby cattlemen breed their own cows. Over the past 18 years, over 16,000 men and women have learned to inseminate their own cows, and to manage their A.I. breeding programs through training received at ABS A.I. Management Schools. Take the Direct Herd route to better cattle .. for YOUR profit. Contact

Invitation to Chester County Farm-Ctiy Week Open House

The Chester County Farmers' Association extends an invitation to visit with farm families in the county who are holding open house on Saturday, November 18, and Sunday, November 19, from 1 to 4 p.m. The main points of interest include:

Amyr Farms - Owned by Dr. Richard H. Stoneback. 45 purebred Arabian horses, 9 stallions, 16 brood mares with foals plus yearlings; 250 goats, 18 milking, 100 kids, 2 bucks, 40 yearlings. New 140 foot by 80 foot goat barn, 24 box stalls, room for 250 milkers. New 30 stanchion milking parlor. Milking time 4 to 6 p.m. Also cows, chickens, ducks, geese and rabbits. Herdsman Steve Donsidine. Location - Scroggy Road and Hayesville Road.

K-K Ranch — 102 acre dairy farm owned and operated by Nathan and Melba King. 30 heifers and 70 milk cows. Milking done in new milking parlor between 3 and 5 p.m. Visitors welcome. Located Route 896 between Russellville and Forestville.

Llanduey Farms — Owned and operated by Russell and John Hicks. 100 cow dairy farm with free-stall barn, Harvestore silos, conventional milking system. Bottle and sell Certified State approved whole raw milk. Full line of farm machinery. Located two and one-half miles east of West Chester on Paoli Pike (old Route) 202.

Lenape Dairy Farms — Owned and operated by Dwight Rath. 600 head Registered Holsteins. 350 milking cows in free stall barns with milking parlor. All the latest in equipment and building. Located four miles southwest of Media off U.S. Route 1. Turn south on Wawa Road.

Batchelor's Flowers — Retail operation, nine greenhouses with growing plants for holiday season. Air conditioning and Co-2 conducted in all houses. Controlled heat, hot water and steam controlled air circulation. Location - Snowdenville, one mile west of Route 724 at Parkerford.

My-T-Hi Farm — Owned and operated by S. Horace Mowrer and family Dairy farm with pipeline milker, 100 Holsteins, 80 heifers in free stall barn. Storage barn, silos, bunk feeders constructed after fire destroyed original barn in December, 1971. Located one-fourth mile west of Route 724 on Bridge Street

Buttonwood Farm — Owned by Mr. and Mrs. Robert O Snelling, Sr. 160 Brown Swiss dairy cows housed in comfort stall barns. 70 head of young females and bulls. Visitors welcome to watch pipeline milking after 3:30 p m Located Hollow and French Creek Roads. South of Kimberton - Pughtown Road at Roberts Market.

Titus Beam — 225 acres, 200 beef cattle, 500 feeder pigs and 30 sheep. Located at junction Route 401 and 82. Lane to farm on 82

Morris and Alvin Zook — 150 acres, 40 Ayrshires, 8 horses and mules, horse and colt, 1,400 laying chickens Gehl machinery agency West of Honey Brook on Route 322. Turn right at Agrico Fertilizer Plant. **No Pictures.**

Nottingham Cannery, Growing Division — Lovell Chase, Manager Approximately 80,000 square feet of growing area New modern refrigeration and ventilation systems Located on old U S 1 behind Oxford Bowling Alley Mushrooms for sale.

Green Valley Farms — operated by Wilkinson Farms 200 milk cows, modern bottling plant to supply retail outlet Spray irrigation waste disposal system Located on Pen Green Road between Route 1 and 41

Glen Willow Orchard — 45 acres apples, 10 acres peaches, 55 acres crops 11,000 bushel cold storage Modern packing line Located north of Avondale on Glen Willow Road

Bernard's Orchard and Greenhouses — 50 acres fruit, mainly apples. 12,000 bushel cold storage Wholesale florist with 20,000 square feet under glass Carnations and snapdragons grown for Washington, D.C market Automatic oil heat and ventilation Automatic watering and fertilizer application Located on Route 842, two miles east of Unionville

Agriculture Must Tell its Own Story

The American public holds some misconceptions about the food and fiber industry, and the producers of food and fiber probably have some misconceptions about consumers

These are the remarks of Sherwood O Berg of the Institute of Agriculture, University of Minnesota, in speaking about the need for better communication at the annual meetings of the American Society of Agronomy

Berg feels that agriculture can be made understandable through a well-balanced exposition containing all the major components of the food and fiber chain "We must talk about the great productivity of American agriculture, how that productivity was reached, and what it has cost us," he says

Berg also feels that the public must get some understanding of the scope and general nature of the food and fiber business from input through production and distribution to the retail store The impact of science, the changes in world and domestic markets, and reorganization of business must all be laid out as well as a consideration of the society and economic implications of changes in agriculture

"But," Berg says, "communication involves more than clarifying facts To command public response, agribusiness, and more especially educators in agriculture, must be concerned about proverty, pollution, and nutrition as the people feel these problems This concern must be translated ultimately into public policy "

Twin Valley Accepts Greenhands

The Twin Valley FFA Chapter held its Greenhand ceremony last week in the vo-ag classroom. Nevin Mast, president, began the meeting with the official opening ceremonies.

All Greenhands had been required to wear dress clothes and a tie to school the previous Friday. They also had to wear a large green hand pinned to their shirt and obtain the signature of the Chapter officers on it - by correctly answering questions on the FFA. The Greenhands were also required to recite the FFA creed, as required by the National FFA Constitution.

Taking the advisor's part in the ceremony was Farnk Stolzfus, state vice-president and Twin Valley's junior advisor.

The following members were received as Greenhands: Steve Bleacher, Gary Cartwright; Mike Cycwesk; Ron Dannecker; Bob Deeds; Harvey Gehring; Craig Hertzler; Bob Johnston; Gary McVaugh; John Miller; Larry Stoltzfus; Doug Yoder; Jim Ford; Stan Stankiewicz; John McNeill; John McDonnell and Libby Miller. Acceptance of these new members raises Chapter membership to 44, including out-of-school members.

Following the degree ceremonies a Greenhand Creed contest was held. All Greenhands were given the chance to compete in reciting the Creed, with an FFA jacket being awarded to the winner. Six of the new Greenhands competed in the contest, which was judged by the senior members. Ninth grader Harvey Gehring was unanimously declared the winner with Gary McVaugh declared the runner-up.

During the business meeting, members discussed ideas for the Building Our American Communities (B.O.A.C.) program of the National Association, as presented by vice-president Terry Murray. Treasurer Bill Ford presented several fund raising ideas for approval. Ford also reported that a total of 600 hoagies were sold for the hoagie sale, and that orders for citrus fruit were presently about even with last years final figures.

Basketball committee chairman Jeff Boltz reported that Owen J. Roberts FFA Chapter had been invited to a basketball game in December. Jeff also reported that the Chapter would participate in the County basketball tournament in February.

President Mast reported that the Berks County Corn, Hay, and Small Grain Contest was held Tuesday, November 14 at the Kutztown High School with three Twin Valley members participating: Frank Stoltzfus, Nevin Mast and Lloyd Simmers.

Mast also announced that five Keystone Farmer Degree applications have been submitted.

Members enjoyed a basketball game in the gymnasium after the meeting and refreshments in the vo-ag shop.

Chapter Reporter,
Thomas Carskadon

By order of Governor Bradford of Mass., the first Thanksgiving was set for December 13 when colonists were to feast and offer thanks for their survival. The menu for that Thanksgiving dinner included venison, wild turkey and many different corn dishes.

Engle Participating in Public Affairs Program

William Engle of Cochranville is currently participating in a unique public affairs education program being conducted jointly by Pennsylvania State University Cooperative Extension Service and Department of Agricultural Economics and Rural Sociology.

The group, comprising 35 people from various counties in the area, is meeting at Hazleton. They are involved in 20 days of intensive training in economics, sociology, communications, public speaking, meeting management, and government. The sessions are designed to provide the participants with a broader understanding of problems facing rural Pennsylvanians.

Those taking part have received W.K. Kellogg Fellowships which are defraying costs of instruction, study materials, room and board while at the institutes, and field trips.

Developing Less Thirsty Plants

The amount of water required to produce the food comsumed by one individual per day is astounding. Over 1,000 pounds of water are required to produce 1 pound of bread and it has been estimated that over 23,000 pounds of water are required by a steer and the forage it eats in the production of 1 pound of beef.

Two University of Arizona agronomists, A. K. Dobrenz and M. A. Massengale, have aimed their research at finding plants which can produce more dry matter with less water. At the annual meetings of the American Society of Agronomy in Miami Beach, Dobrenz reported on the research findings.

The process of transpiration by which plants lose tremendous quantities of water has often been called a necessary evil Dobrenz and Massengale applied several antitranspirant and growth regulator chemicals and found that Gibberallic acid did increase the efficiency of water use

Leaf area reduction can also be utilized to improve the water requirement of cereal grains This involves the removal of the basal leaves on the plant during the stage of maturation, thus reducing the transpiring area of palnts

Dobrenz reported that the total amount of water applied to alfalfa was cut by 40 percent when high producing adapted cultivars were grown and monitoring of the available soil moisture was used for application of irrigation water.

Numerous plant characteristics were observed in an attempt to find a feature which can be utilized by plant breeders to select more water-use efficiency plants The amount of cutin on leaves of certain grass species is significantly related to the water needs of those plants and appears to be an effective technique for isolating efficient lines Various anatomical features of the plant roots also appear to be associated with efficient use of water.

Through plant-water related experiments, we can better understand why so much water is "pumped" through a plant during the growth period Information from these investigations will allow plants to be bred that conserve and more efficiently utilize one of our most important natural resources, WATER

Reed Canarygrass Seen As Potential Feed Source

Reed canarygrass is exceptionally well adapted to and presently growing on large acreages of poorly drained soils However, it also has a potential to yield better than other grasses on upland soils and is very nutritious

The reason farmers do not grow more of it is because animals seem to reject it, even when it is lush and nutritious

University of Minnesota scientists have discovered that this low palatability may be caused by alkaloids. If alkaloids can be controlled, the rejection problem may be solved and more effective feed supply will result.

Announcing: a dry "pop-up"! Can cut planting time in half!

Ortho Unipel STARTER SPECIAL.

A starter? As a "pop-up"? It has to be special.

It is. STARTER SPECIAL is a completely unique product. Here's why:

— Physical Uniformity. STARTER SPECIAL pellets are made to the same shape and density for maximum consistency and control in application.

— Chemical Uniformity Each and every STARTER SPECIAL pellet has all three primary nutrients — nitrogen, phosphorus, potassium — chemically homogenized in precisely the most desirable ratio 13-34-10 The nutrients can't separate or segregate during handling as with troublesome, hard-to-regulate "dry blends"

— Double Duty Nutrients STARTER SPECIAL has both quick-acting and long-lasting nitrogen and phosphorus for thorough plant feeding There is no urea or diammonium phosphate that might endanger the seed through liberation of free ammonia.

Of course, these features also make it highly effective as a banded starter. But, with only slight adaptation of most planters, it can be applied directly with the seed in exacting measurement for safety and maximum response.

With this kind of control, you apply much less material — only 1/3 the amount needed for banding And the reduced material handling could cut your planting time in half!

So, save time, trouble, and money at planting time. See us soon about applying STARTER SPECIAL this spring as a dry "pop-up".

The Spirit of Thanksgiving Day

This November 23 is Thanksgiving Day—one of the most thoroughly American of all our holidays It celebrates the very beginnings of the United States, and the mere mention of this holiday conjures up memories of the traditional turkey dinner

In our seemingly dissentious nation, we tend to lose the real relevance of Thanksgiving — we have the feast without remembering its reason. The importance of Thanksgiving has increased with each passing year The first settlers in our land found the time to offer thanks for their lives, the meager food on their tables and the chance to live in freedom and hope on the hostile shores of an unknown land Let us pause for a few minutes this Thanksgiving to contemplate the many good things we enjoy and offer our thanks for them. In doing so, we shall gain a renewed strength to tackle our difficulties and imperfections with faith and good spirit.

With gratitude for the strength, purpose, charity and pride of our forebearers to which we owe the freedom and opportunity that bless us today, let us bow our heads this Thanksgiving Day. It is indeed a day to count our blessings. And it is a time to renew our care of them for the sake of generations yet to come.

Grassroots Opinions

LAWRENCEBURG, KY, ANDERSON NEWS "In Falls Chuch, Va, awhile back, a popular mayor was defeated because most of his supporters assumed he would be re-elected and did not vote Feeling guilty, they gave an 'appreciation picnic' in his honor which was attended by a clear majority of the townspeople. So, if we have candidates we are supporting in the coming election, it might be well to remember his brief remarks to the picnic assemblage 'I am greatly honored that so many of you have come out to wish me well But, if I ever seek office again, please let's all get out and vote and skip the picnic."

REINBECK, IOWA, COURIER. "If we had no cars on the street, there would be no automobile pollution If we built no power plants, we would have no pollution from utilities If we had no phosphate detergents, we would have no pollution of our waterways, and so on But what kind of country would we have left?"

ALTOONA, PA, MIRROR "Never before in our history has irresponsibility been so socially acceptable "

TOWNSEND, MONT, STAR 'Everybody gets a share at government expense' is much more appealing than 'you have the freedom to make your own share' "

NEW YORK, N.Y., EDITOR & PUBLISHER. "The Arizona legislature has before it a bill which would impose a 1-cent per copy tax on newspapers printed by a publisher not having a paper recycling program It is discriminatory, of course....Why not tax the automobile manufacturer for not picking up those abandoned cars he produced?"

MYRTLE CREEK, ORE., MAIL: "Much has been made of the greater exemptions and lowering of income tax rates for the U S taxpayer. Unfortunately, not so much attention is devoted to the fact that his social security rates keep advancing, which, even if inflation were completely halted, would nullify net gain. And now a national magazine headquartered in Washington warns that it is a certainty that shortly after election this year, proposals will be made in Congress for a type of national sales tax. Such a tax would hit the taxpayer for more than the so-called savings he is making via the income tax proposals It would be no favor. Maybe it would be well to quiz the candidates for this year on such a probability and get a commitment before deciding where to mark our ballots this fall."

NOW IS THE TIME . . .

Max Smith
County Agr. Agent
Telephone 394-6851

TO IMPROVE FARM-CITY RELATIONS

Everyone throughout Pennsylvania is urged to recognize the week of November 17 to 23 as Farm-City Week-a time when farm folks and urban folks can get better acquainted. The distinct line between farm and city no longer exists in most communities. It is desirable for all folks in a community to work together regardless of their vocation. Farmers are urged to invite their urban neighbors to visit their farm and learn more about the production of food and fiber. Urban families with children are especially urged to take the time and effort to get their youngsters on a farm and learn more about animal and crop production.

TO STORE FARM MACHINERY

The seaaon is practically over for most pieces of farm machinery and they should be properly stored until the next growing season. As we travel the roads of the county, we continue to see too much machinery still sitting outside in the weather. We urge farmers to get the machinery under cover. Moisture and the resulting rust is the main enemy of most farm machinery. Good management suggests that a special barn or shed be built for this machinery. The original investment is high and when kept in the dry during the off-season, the life of the machinery can be lengthened. Don't store it out "under the sky".

TO ALLOW COWS OUTSIDE EXERCISE

This is not a new suggestion but continues to be an important one. Dairy cows need exercise at least once a day if they are to stay in a vigorous, healthy condition. The outside exercise lot should be free of large boulders, stumps, logs, mud holes, or junk piles where the cows may injure their udders or legs. Outside exercise gives the dairymen a chance to observe sore feet on his cows, and to detect proper breeding times. When they are turned out each day for 15 to 20 minutes weather conditions should not harm them unless there is a severe blizzard or freezing rain. Some dairymen resist daily exercise for their milking herd because of the time required; dairy authorities agree that this time is well spent and will pay good dividends.

TO CHECK BATTERIES

Cold weather is hard on batteries in service or in storage. We suggest that the battery terminals be cleansed with soda water and then coated with petroleum jelly or light grease. Be sure the battery is tight in its holding cradle, Keep the water levels high during the winter but be certain to operate the machine for a period after adding additional water. When starting the engine hit the starter in brief contacts; continous grinding will do little good. Batteries are very important to all of our cars, trucks, and tractors; cold weather increased their work load; try to keep them in the best condition. It will save time and delay.

THE BIBLE SPEAKS
International Uniform Sunday School Lessons
BY LAWRENCE W. ALTHOUSE

NOT ENOUGH CHRIST

Lesson for November 19, 1972

Background Scripture: 2 Kings 14:8-14; Psalms 33 13-7; Isiah 31; Jeremiah 21, 27; 2 Peter 3:18-13. Devotional Reading. Jeremiah 32 16-25.

During the Second World War, after a grueling battle in the South Pacific, a chaplain stopped to comfort an American soldier fatally wounded by an enemy flame thrower. Near death, the soldier gasped: "I guess - - - we have - - - too much chemistry - - - and not enough - - - Christ."

Rev. Althouse

It might be argued whether or not we have or had "too much chemistry," but it seems evident that much of the miseries of warfare reflect the fact that we have "too little Christ." Perhaps it wouldn't matter how much chemistry and physics and aerodynamics we have, if we had enough Christ to go along with these.

The war horse—a vain hope

This may seem to be a problem that has its origins in our contemporary times, but, in actuality, it is a very ancient problem. Before there was chemistry and physics, guns and airplanes, there were swords and chariots. The weapons may change, but the problem remains the same.

The psalmist puts his finger on the issue:

> A king is not saved by his great army;
> a warrior is not delivered by his great strength.
> The war horse is a vain hope for victory,
> and by its might it cannot save. (33:16, 17)

The problem, says the psalmist, is the foolishness of looking to armorments for security. Men have always relied upon bigger, better weapons, yet often the bigger, better weapons have increased, rather than decreased the danger and destruction.

The prophet Isaiah also picks up this theme:

> Woe to those who go down to Egypt for help and rely on horses,
> who trust in chariots because they are many and in horsemen because they are very strong,
> But do not look to the Holy One of Israel or consult the Lord (31:1).

"Things that are unseen"

What Isaiah is saying is that the true security of Israel is to be found in God, not warriors, horses, chariots swords, or even military alliances The leaders of Israel depended upon their military alliances with Egypt to protect their nation, but Isaiah calls attention to this fallacy. "The Egyptians are men, and not God; and their horses are flesh, and not spirit" (31 3)

History has proven correct these prophets again and again Despite great armies and better weapons, despite grand alliances and diplomatic maneuvering, again and again nations have tasted the bitter cup of war in all of its destructive power

What we need today, as ever, is not less technology, but more Christ

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U S A Released by Community Press Service)

CONCENTRATE ON PROFITS . . .

with pennfield Beef Concentrates.

The Pennfield beef feeding program has the proper concentrates needed by your beef cattle to make the maximum gain per pound of your feed, whether you're feeding grain or silage or a combination of both. Balance off your grain or silage and get the most from them with the addition of any of the Pennfield Beef Concentrates.

Give Pennfield a call. One of our Feeding Planners will help you get the most of each ton of silage or bushel of grain . . . and that can mean extra profits for you.

Make More Milk... Make More Money

Beacon Golden Test Rations

C.A.F. — The Cow Acceptability Factor — determines how much grain your cows will eat. Beacon Golden Test milking rations are partially pelleted, contain a proven level of crimped corn for extra palatability. Even finicky eaters clean these feeds up well, responding with higher milk production than when fed less palatable feeds.

The Cow Acceptability Factor helps get more grain into your cows in critical periods of milk production. Call us today for Beacon Golden Test Rations with C.A.F.

Chester Countians Compete In State 4-H Horse Show

Months of intensive practice and competition in local, county and district shows paid off for a number of Chester County 4-H members last week when they won awards at the State 4-H Horse Show in Harrisburg.

Shauna O'Connor, Avondale, placed third in Working Hunter Ponies and sixth in Junior Division - Hunt Seat Equitation over Jumps.

Second place ribbons went to Karen Mest, Pottstown, in Senior Division Hunt Seat Equitation over Jumps and Pam Taws, Paoli, in Open Trail. Loretta Chicarelli, Lafayette Hill, placed third in Working Hunter Horses, Frances Dunn, Chester Springs, placed fourth in Senior Division Hunt Seat Equitation and Melissa Kratz, Pottstown, placed fifth in Senior Division Hunter Seat Equitation over Jumps

Other county horse club members competing in the State 4-H Show were Cynthia and Stephen Winckelman, Malvern

Riders and their horses, all winners in county and district elimination shows, were entered in 27 different classes with members from each district in the Commonwealth competing Approximately 380 contestants participated in the show

The primary purposes of the State 4-H Horse program are to develop riding skills, gain self-confidence by competing in shows, receive training in leadership and citizenship and learn the meaning of responsibility by caring for an animal The classes in the state contest gave members an opportunity to display their skills in horsemanship and ability to groom a horse for showing

The State Show climaxes the year for more than 6000 Commonwealth 4-H members enrolled in the horse project More information about 4-H and the horse project in Chester County may be obtained by contacting the Agricultural Extension Office, Room 402 North Wing, Courthouse, West Chester

Agronomist Cautions Against Improper Fertilizer Application

University of Illinois agronomist, L F Welch, speaking at the annual meetings of the American Society of Agronomy, said that the use of fertilizer in crop production today is a must if we are to produce adequate supplies of food at a reasonable cost to the consumer

The soil is one of our most valuable natural resources which must be conserved and maintained in a productive state for eons to come Welch said the American farmer often treated the soil harshly in earlier years as it was exploited of nutrients necessary for plant growth.

The earlier trend of nutrient depletion of soil is being reversed today, he said, and fertilizer made it all possible Fertilizer is added to supply the nutrients removed from the soil in harvested crops and to restore part of that removed in earlier years

The use of fertilizer has resulted in restoring soil productivity to the extent that many soils will produce more food today than when they were first plowed by our forefathers By increasing crop yields with fertilizer, less land is required to produce a given amount of food freeing land for parks, golf courses, homes, and other nonagricultural uses

But, Welch cautioned, fertilizer cannot be used with reckless abandon Some of the nutrients in fertilizer may degrade water quality Research is underway to determine fertilizer management practices that will permit society to continue to reap the benefits of increased food production without imparing the quality of our water

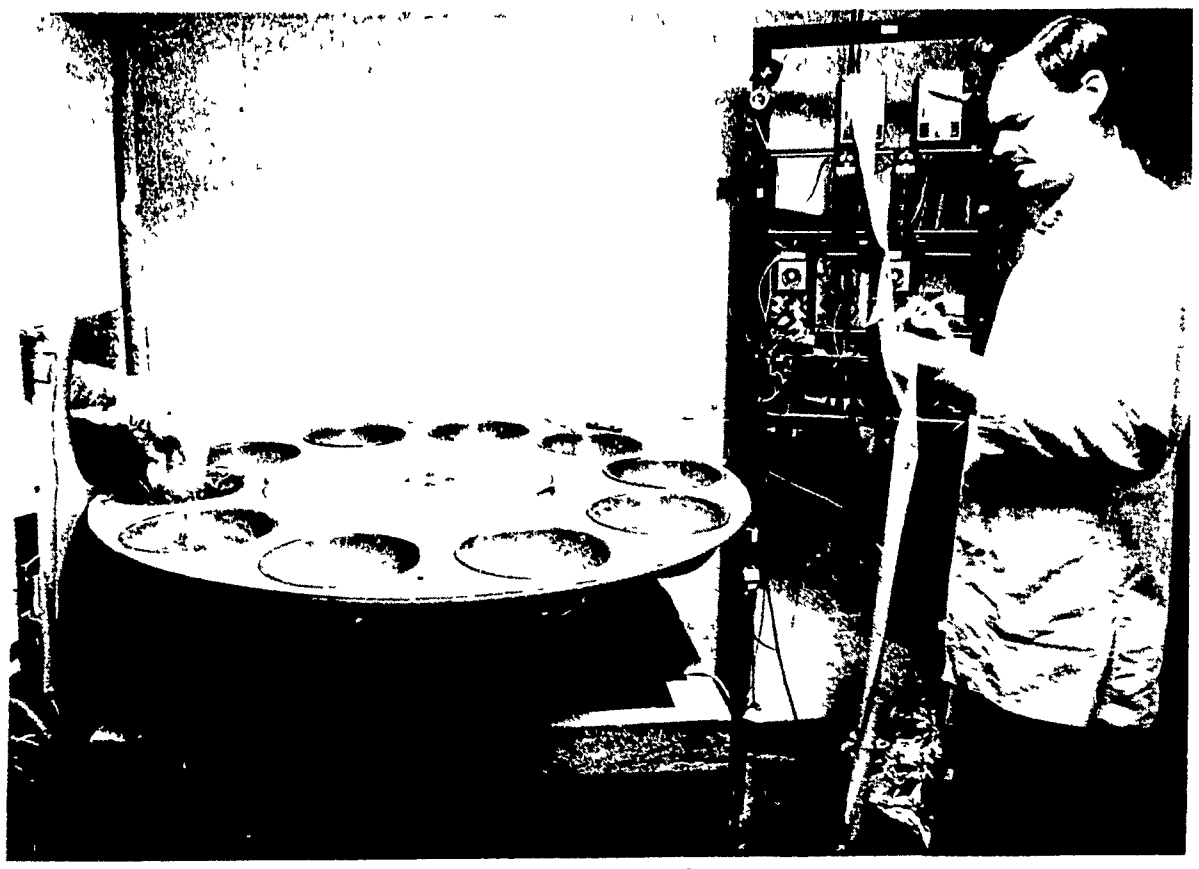
Animals Are "Tricked" Into Eating More



Electronically controlled feeding behavior unit at Penn State shows sheep eating from rotating turnable. The device measures the frequency and length of eating and size of meals. Dr. Paul Wangsness, in charge of the experiments, studies electronic "printout" of the sheep's eating and drinking patterns.

Experiments to trick livestock and dairy cattle into eating more feed than they normally consume are a new approach to more economical meat and milk production Such studies are being carried out by animal nutritionists at The Pennsylvania State University

The Penn State scientists have been able to increase short-term feed intake of calves and sheep tenfold by injecting a small amount of tranquilizer, pentobarbital, into a specific area of the brain. The studies have shown that certain areas of the brain control an animal's feeding behavior Directing the studies were A. D. Peterson, Dr. B. R. Baumgardt, and Dr C. A. Baile of the department of animal science

The work indicates that there are "feeding centers" in the brains of cattle and sheep which signal the animal to start and stop eating. The blood acts as a communicator between all parts of the body and the nervous system.

As an animal eats, end-products of digestion are absorbed from the stomach into the blood. The end-products, or other chemicals triggered by them, can quickly reach the brain and communicate a signal of being fully fed.

Unfortunately, today's high energy feed rations tend to produce a "full" signal from the brain and animals stop eating before their stomachs are full. This occurs in feedlots and dairy operations where the trend is toward large amounts of grain concentrates and small amounts of roughage. Rations high in grain are desirable since they produce increased yields of meat and milk per dollar of feed.

Dr. P. J. Wangsness, a new member of the animal nutrition faculty, is working with the Penn State research team to determine exactly how the control mechanism of feed intake works. Such knowledge will enable nutritionists to develop the most economical ways for farmers to control feeding of livestock.

Equipped with adequate information, farmers could increase feed intake above that now possible for milking cows and meat producing animals. On the other hand, farmers could more easily limit the feed intake for mature, non-milking livestock.

The Penn State experiments are carried out in unique, electronically controlled feeding unit. Using a rotating turntable, the unit allows the animal to eat and drink whenever it desires. The device measures the frequency and length of eating and size of meals. The unit helps identify changes in levels of disestive end-products in blood or rumen fluid which may act to control feed intake.

Sheep placed in the feeder units are surgically equipped with plastic sampling tubes. These long tubes enable researchers to remain outside the feeder unit while withdrawing blood or rumen fluid from the undisturbed animal.

Among end-products of digestion that lower feed intake are fatty acids and glucose. In ruminants or cud-chewing animals such as sheep and cattle, large quanities of volatile fatty acids are produced in the rumen or stomach and are absorbed into the blood. These acids can reduce feed intake significantly.

The sheep experiments reveal rapid changes in levels of blood and rumen fluid metabolites such as volatile fatty acids before, during, or after feeding. Blood levels of hormones, such as insulin, also fluctuate and may be a part of the signal carried to the feeding centers of the brain.

Scientists Report On Hybrid Barley

Malt, an essential ingredient to the brewing and distilling industries as well as being used in many foods, is experiencing a rapidly expanding demand At the present time most malt is made from spring barley

Research reported at the annual meetings of the American Society of Agronomy in Miami Beach by two Pennsylvania State University agronomists, Robert P Pfeifer and A Akyurek, indicates that the solution for this expanding demand is to develop winter barley with satisfactory malting quality.

Malting operations consume 130 million bushels of barley annually If projected needs hold true, the figure will rise to 240 million bushels annually by 1985 Pfeifer and Akyurek, through their research directed at meeting this malt demand, have found that it is possible to develop winter barley through selective breeding

The desired quality is attained by selecting pure lines that produce fine-sized kernels In addition, they must have a relatively high amount of soluble protein

This knowledge will help plant breeders to develop varieties of winter barley for malt production and thus meet the rising demand

The Value of Field Borders

Field Borders not only provide cover for wildlife, they also give protection against soil erosion and aid in controlling insects Field borders give wildlife a place to hide provide travel lanes and offer variety in wildlife habitat In fact, natural field borders contain several species of vegetation which provide the variety of food and cover types the wildlife demands

By allowing turnrows and fencerows to grow up in natural vegetation or by planting field borders, a farmer can hold his soil in place during heavy rains and wind This is true on even a very slight slope

Also, research has shown that field borders provide homes for predators of insect pests Examples include songbirds spiders and shrews Some helpful insects such as the praying mantis, and certain species of wasps also destroy insect pests

What's New In Banking

The Federal Reserve has a new plan going into effect early in 1973 to move checks faster within large geographic areas In each of the 12 Federal Reserve areas, computerized check clearing centers are being developed to process checks overnight The transaction record will go back to the depositor's bank and be subtracted from his account the next day after the check is cashed As a result of this superfast check clearing, depositors will have to be sure they have adequate money already deposited to cover the checks they write

An innovation in checks is the picture check - one with a pretty picture of mountains lakes, etc Also, one can now get a close-up unretouched photograph of the account owner on the check These are useful in places where the check writer must establish identification to cash checks They would be most useful in urban areas and with people who move or travel

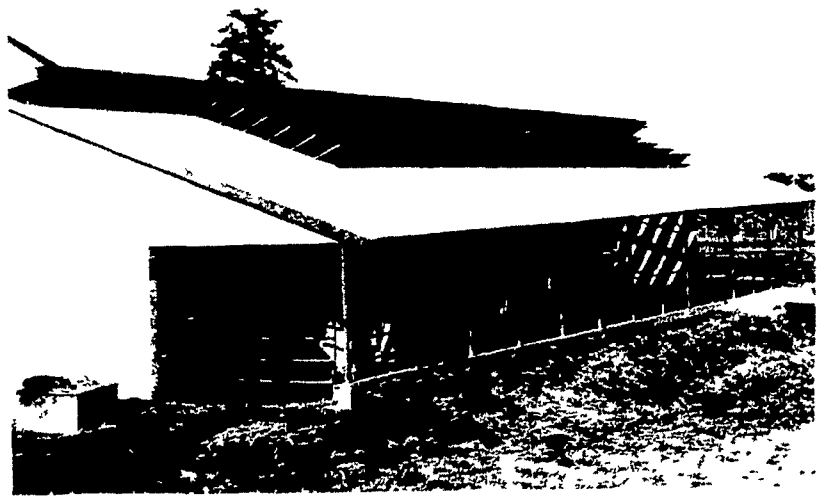
PUT YOURSELF INTO THE FUTURE!
LET THE SUNSHINE IN WITH...
SOLAIR SYSTEMS
SOLAIR COW BAY WITH THE "SUN SENSOR"

FEATURES THE FOLLOWING:
1 Storm-and fire-resistant construction
2 Rapid evaporation and dehumidification through "solar thermo" circulation
3 Engineered for expansion
4 Designed for either beef or dairy cattle
5 Straight line scrape areas
6 "Quick dry" floor areas
7 North side ventilation—summer only
8 Three sided wall structure—open South
9 "Jalousie type" Southern roof provides direct sun rays on 80 per cent of floor — OPTIONAL
10 "Sun Sensor control automatically opens and closes optional jalousie roof for maximum winter comfort
11 Complete herd grouping accommodations
12 Automated feed control



WE'RE INTERESTED IN ECOLOGY!

With our completely covered lots and a sun roof with an open peak, rain water does not enter the bay area and maximum evaporation of animal liquids is obtained. An "all-drained" floor system is installed and a curbed fence line keeps manure in place to be scraped into a liquid pit or a push-off loading system By preventing manure run-off the surrounding area is not polluted.

Yes, since your urban neighbors and government fathers are interested in ecology, we are ready to help you build a system that will put you ahead on the pollution problem.

And, low moisture levels in Solair Systems results in less bacteria action and fewer odors.

Keystone Expo Area Winners

The 16th Keystone International Livestock Exposition closed last Friday at the Farm Show building amid the usual declarations of "bigger and better than ever before." It was.

With more than 125 champions and literally hundreds of first-in-the-class blue ribbons it is difficult to pick out the most singular triumph but certainly Bedford County must be standing a little taller.

It was also Pennsylvania's best finish among the beef breeding classes being able to come up with only a couple of reserve grand championships in the other breeds Falkland Farm also showed the champion heifer calf, reserve junior bull and the best six head

Breeding swine continues to be the state forte at the Keystone International where they garnered six of the seven premier exhibitor titles and produced 11 of the 14 champion boars and gilts The complete list follows

Chester White — James T Parlett, Airville, York County, boar and exhibitor, Boyd Bros, Broque York County, gilt

Duroc — Clyde McConaughey & Son, Smicksburg, Indiana County boar gilt and exhibitor

Hampshire — Strawbridge & McClearv Stewartstown, York County, boar gilt and exhibitor

Poland China — Richard P Sholley, Jonestown, Lebanon County boar and exhibitor

Spotted Swine — Sholley, boar and exhibitor, Denton L Griest, Abbottstown, Adams County, gilt

Pennsylvania sheep raisers and all of the other states entered were lost in a flurry of ribbons that headed toward Ohio. Pennsylvania State University was the lone premier exhibitor in the state out of judging that covered 11 breeds. PSU scored in the Southdowns where they also showed the champion ram. Mrs. Milton K. Morgan, 1916 New Holland Pike, Lancaster County, exhibited the champion Suffolk ram

In carcass classes Pennsylvania came out of the on-foot judging with the grand champion barrows, a Yorkshire-cross entered by Reno Thomas. That didn't serve the on-rail evaluation but a lamb carcass entered by H Thomas Van Wagner, Dauphin, moved up from fourth-place in the live judging to the grand championship carcass wethers.

This is not strictly a red meat show as juding of horses was involved in six days and nights of the week-long Livestock Exposition

Pennsylvania State University won the intercollegiate division and the state champion team second in the 4-H division of the Northeast Regional Horse Judging Contest. The Pennsylvania team is from Cumberland County.

Open breeding and performance classes were also staged for Quarter horses, Arabians and Appaloosas.

The livestock exposition closed with the Pennsylvania State 4-H Horse Show.

Area winners and their categories included:

Steers

Carcass Steers on Rail, Summer Yearling Angus — Octoraro Farm, Nottingham, third.

Pens of Five Feeder Steers, Angus — Walter S Laird, Dover, second.

Pens of Five Feeder Steers, Hereford — F. Malcolm Wright, Abbottstown, first

Angus Breeding Cattle, Late Junior Yearling Heifers — John W. Holloway, West Chester

Early Senior Calves, Bull Calf Champion, and Reserve Grand Champion Bull — Soleil Farms Inc., Downingtown.

4-H and FFA Junior Beef Breeding Classes

Angus Late Summer Yearling Heifer — James Wilson, Glen Rock, third.

Purina Pig Starters
give your pigs EXTRA protection
for about ½¢ per day

It takes mighty little dry feed and sow's milk to fill the tiny "fuel tank" of a baby pig from the time he's a week old until he's three weeks old. An average of about an ounce a day of loaded-with-power Purina Baby Pig Chow or Purina Early Weaning Chow is all it takes to give him extra energy, fast growth and disease protection.

This extra protection during this critical period costs about ½ cent per pig per day! That's low-cost insurance to provide pigs with the "built-in" livability, the grow and go power, offered by Purina starters.

Pigs *love* Purina Baby Pig Chow and Purina Early Weaning Chow, too—and that's important, for it makes no difference how great a pig starter may be, if pigs won't eat it.

Let us help you get your pigs off to a thrifty start with Purina Baby Pig Chow or Purina Early Weaning Chow. Stop in and see us soon.

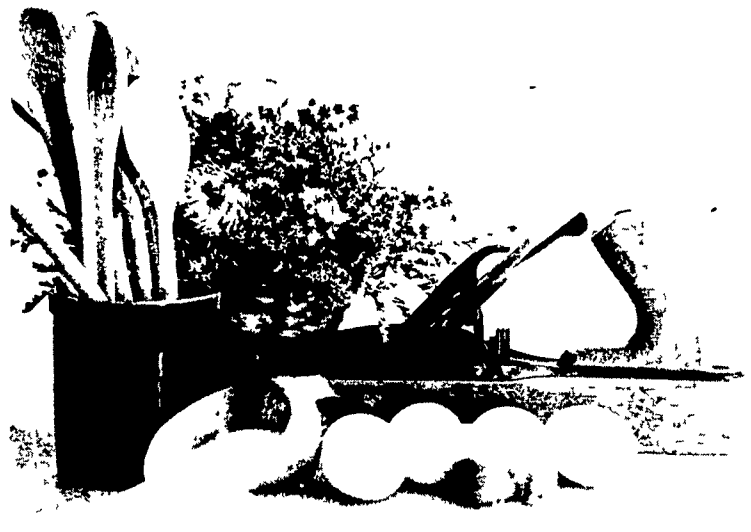
Homestead Notes

Pat Erway, Editor



The Sahm Family has . . .

Year-Round Job to Provide Trees for Christmas

By Mrs. Charles McSparran
Farm Feature Writer

Mrs Jay H (Mary) Sahm, Manheim RD4, is kept busy these days answering telephone calls, measuring, tagging and even cutting a few Christmas trees for their customers Many people select their tree in October or November. Mrs Sahm takes people up in the hills, measures the trees and tags them with the person's name and the price of the tree In this way they can get them nearer Christmas, yet have a better selection

They charge by the foot. She and Mrs Sahm do all the work themselves so their price is quite reasonable She says they could sell lots more trees if they had them She says "It's nothing to sell 15 trees in an afternoon. I cut them and load them Weekends we both do."

Twenty years ago Sahms bought this nine acre farm which is located on Elizabethtown Road, about one and a half miles west of route 72 Elizabethtown Road is about three miles north of Manheim and goes west to Elizabethtown square. The farm had several evergreen trees planted on it when they bought it. Sahms have been planting and selling trees about 16 or 17 years. They have about three acres planted in evergreen trees. You might say it's a hobby with Mr. Sahm. He orders seedlings and transplants each year to replace the ones which have been cut. Then in April or May he digs the holes and Mrs. Sahm plants them. He does all the pruning and sprays the trees for diseases. They lose quite a few trees every year.

They have all kinds including white pine, Austrian pine, Scotch pine, Douglas fir, blue spruce, black spruce and Norway spruce. They sell more Scotch pines than any other kind. In spite of the care given the trees Mrs. Sahm says "There's no perfect tree."

Besides taking care of the trees Jay is a junior accountant at Warner Lambert Company, Lititz. He has worked there five years. Prior to that he worked as a junior accountant for an insurance company for 18 years.

Mrs. Sahm has been a teachers' aide for grades one to six at Mastersonville Elementary School for 12 years. She says "I love it. I love kids. No two days are alike. I do clerical work, typing, mimeographing, keep attendance records, sell lunch tickets, am on the playground, patch knees, take temperatures etc." There are 178 children that she works with.

Sahms rent their farmable land to a neighbor. For 15 years they kept anywhere from seven to 12 sheep. They sold lambs and butchered some for their own use. Three years ago they sold them to a neighbor. They also used to have eight hives of bees but quit when they got disease in them.

Both Mr. and Mrs. Sahm grew up on farms. Mary is one of seven daughters of Mr. and Mrs. Henry Shreiner who live on their farm at Oregon, Manheim Township. Mary's sister, Ida Risser and husband, Allen, now own and operate one of the farms Mr. Shreiner owned and farmed. Jay, the son of Mr. and Mrs. Harry Sahm, grew up on his parents farm outside Manheim. His father is retired now but he and Mrs. Sahm still live on the farm. A neighbor farms the land.

Sahms have three children. Harold received a Masters degree at Rutgers University, New Brunswick, N.J. He married Georgette Hart of Lancaster and they have one daughter. They live at Scotch Plains, N.J. where he is a teacher in Rahway State Penitentiary. They have a unique system of education there whereby inmates who have not graduated from high school can get a high school diploma. They also have a college professor who comes in to teach them college courses in the evenings.

Kathlene took a two year x-ray technician course at the Lancaster General Hospital and has been doing this work at the J.C. Blair Hospital, Huntingdon, for three years.

Michael is a senior at Manheim Central High School. He spends half a day there and half a day at the Mount Joy Vo-tech School where he is taking a Distributive Education course. It includes store management, training in

(Continued On Page 21)

Mrs. Jay H. Sahm, Manheim RD4, goes up in the hills with her measuring stick and saw to tag and to cut Christmas trees.

Ladies, Have You Heard?

Extension Home Economist

About Turkeys with Convenience Features

Today's turkeys come with a variety of convenience features to please modern homemakers. You may already appreciate time-saving, self-basting turkeys, ready-stuffed birds and boil-in-the-bag slices with gravy. But food researchers continue to seek new ways to make cooking easier. The very newest item is a turkey that cooks in its own clear bag. The package has a seam, held together by special glue, which breaks open a half-hour before the turkey is done. This is done to permit browning.

Since the packaged turkey cooks by the steam method, cooking time is reduced. However, the packaging prohibits stuffing the bird and storing the giblets inside the turkey.

Another convenience item on the market is a turkey with a built-in thermometer that pops up when the turkey is fully cooked. However, these thermometers aren't entirely reliable and you should use them only as a guide

People who like rolled turkey roasts will appreciate the new imitation skin that now holds the roast together. Made of components of real skin, the imitation skin doesn't develop the rancid taste that sometimes happens with poultry if it has a fat deposit under it.

Your Thanksgiving Turkey doesn't have to be traditional. Try some of the new turkey products on the market.

xxx

About Turkey Planned-Overs

Turkey that provided a delicious feast on Thanksgiving Day can become dull, unappetizing fare when it reaches the leftover stage. Instead of tiring your family of turkey, freeze the leftover meat for delicious dishes later on.

You can prepare tasty casseroles by combining cubed turkey with vegetables, sauce, seasonings, cooked spaghetti, macaroni, noodles or converted rice. Regular rice and potatoes can become mushy after freezing so you may not want to include them in making your planned-over turkey dishes.

Prepare the casserole, cool quickly and place in meal-sized freezing containers or a casserole dish. Cover tightly with moisture-vapor resistant wrap and freeze immediately.

If your family prefers turkey sandwiches and creamed turkey dishes, you can freeze the leftovers in slices and small pieces. If possible, cover the slices and pieces with broth or gravey to prevent contact with air. This also lengthens storage life. Package in air-tight, meal-sized packages or containers and freeze quickly.

Frozen turkey doesn't improve with age, and it doesn't retain good eating quality for as long a period as do other meats.

If you're going to freeze turkey, remember this freezing guide- one month for slices or pieces; six months for slices or pieces covered with broth or gravy; and six months for turkey casserole dishes.

xxx

Enjoy your Thanksgiving turkey planned-overs by freezing the meat in a form your family will enjoy - it will be a time saving dish for you to prepare, too.

Know Your Turkey's Name

Check the name when you select your Thanksgiving turkey. It's your clue to tenderness because the name depends on the age of the bir. Young Tom, Young Turkey or Young Hen indicates a tender-meated bird. However, Tom Turkey or Hen Turkey are signs of an older bird. Moist heat methods of cooking will make these turkeys more tender.

All-American Bird

Turkey, the only native poultry bird on the American scene, flew up the continent of America from Mexico before the Aztec Indians domesticated the turkey from its wild state.

Handle Holiday Bird Safely

Homemakers are again reminded to handle the Holiday turkey **safely**. These tips come to us through the courtesy of the Chester County Extension Service.

— Store turkey safely before cooking-

- Fresh. Clean and wash cavity. Cover, Refrigerate **one day only.**

- Frozen. Keep frozen until time to thaw. **Do not thaw commercially frozen stuffed turkeys.** Follow package directions.

— Thaw frozen turkey safely — **Keep in original wrapping** for any method.

- Refrigerator is best. Place turkey in refrigerator, one to two days for small, two to three days for larger birds.

- Cold water method. Place turkey in pan of **cold water.** Change water often. Five to nine pounds thaw in three to four hours; larger birds take four to seven hours. **Cook turkey as soon as thawed.**

— Paper bag method. Put turkey in large paper bag on a tray. Four to 10 pounds takes six to 10 hours to thaw; 10 to 16 pounds takes 10 to 14 hours and 16 to 24 pounds takes 14 to 18 hours to thaw. The paper bag insulates and keeps the turkey cold enough on the outer surface.

— Stuff the turkey **just before roasting.** To save time on the busy Holiday, prepare ingredients for the stuffing the day before. **Never stuff a bird the day before.**

— Roast at 325 degrees F. If using a thermometer, interior temperature should reach 180 to 185 degrees F. Oven can be lowered to 300 degrees F. if turkey is cooking too fast or browning too much.

— Remove all stuffing from the turkey when serving.

— Refrigerate leftovers as soon as meal is over. Store gravy, stuffing and meat seaparately. Cool as soon as possible.

Trees for Christmas

Continued From Page 20

sales and to be a buyer. He is working part time selling at J.C. Penny Company in Lancaster for practical experience. He hunts old bottles and has hundreds of them. He also has sold quite a few.

Sahms are members of Zion Lutheran Church, Manheim. Mary taught a Sunday School class there when their children were small.

Mary is a Republican Committee Woman and always strives to get out voters. She served as president of Mastersonville PTA several years ago. She formerly belonged to Farm Women Society 8 and was active in it several years.

Mary says "Cooking is my first hobby and flowers second." She has 15 or 20 cookbooks. She bakes nearly all their bread. She makes whole wheat buns, rum bread, tomato bread, Sweedish rye bread and herb bread. She makes herb butter. She has a rum pot and just keeps adding fruit to it. They use it on ice cream and desserts.

Mary Sahm cuts her homemade herb bread.

Since this is the holiday season Mrs. Sahm passes along a hint for roasting a turkey. She puts the turkey in a heavy paper bag and ties it shut. She roasts if for 25 minutes per pound at 325 degrees. You need no water with it.

She gives us these recipes:

Herb Bread

½ cup sugar, plus 1 teaspoon
1 tablespoon salt
1-3 cup butter
1-3 cup boiling water
2 pkgs. dry yeast
2 eggs
¼ cup lukewarm water
2 tablespoons mixed herbs seasoning (can substitute)+
2 tablespoons chopped parsley
¼ cup chopped pimientos, drained
8 cups unsifted flour

In a large bowl dissolve ½ cup sugar, salt and butter in boiling water. Cool to lukewarm. In a one cup measure, put ¼ cup lukewarm water, the remaining one teaspoon sugar and the yeast, let yeast bubble until it fills the cup, then add to other mixture. Beat eggs and add, stir in seasoning, parsley and pimientos. Add four cups of flour, beat until smooth Gradually mix in four remaining cups, beat till smooth. Knead well. Put in greased bowl, cover with wax paper, put in refrigerator for three hours. Remove from refrigerator. Cut in three parts. Rub hands with butter and knead till all air is removed, shape into three loaves, place in well greased pans. Cover lightly and let rise in a warm place 1½ hours. Bake for 15 minutes at 350 degrees for 30 minutes, the 300 degrees for 30 minutes. Cool in pans, do not cut for hours.

+Can substitute for herb seasoning 1½ teaspoon resemary, ¼ tsp. thyme, 1 tsp savory, ½ tsp. sage and pinch of garlic salt

xxx

Butter Croissants

Dissolve one package yeast in one cup warm water. Stir in one cup flour, ¾ cup evaporated milk, one egg, 1-3 cup sugar, ¼ cup melted butter and 1½ teaspoons salt. Stir till smooth.

Mrs. Sahm is braiding a wool rug for her son. Some of her antique furniture and her 9 X 12 braided rug can also be seen.

Put four cups flour and one cup cold butter in large bowl. With two knives cut till size of beans Add yeast mixture and stir only till flour is moistened

Cover tightly with plastic wrap and refrigerate for four hours to four days Put ball on floured board and knead six times Divide into four parts and roll each part into a circle, cut each circle into eight wedges and roll up, starting at broad end Shape into crescents. Cover with tea towel and let stand for one hour. Brush with egg and water. Bake 35 minutes at 325 degrees.

xxx

Chocolate Pecan Pie

Serves 8

Unbaked 9 inch pie shell
1 cup chocolate bits
2-3 cup evaporated milk
2 tablespoons butter
2 eggs, beaten
1 cup sugar
2 tablespoons flour
¼ teaspoon salt
1 teaspoon vanilla
1 cup chopped pecans.

Combine chocolate, milk, butter. Cook over low heat until creamy and smooth. Combine remaining ingredients and gradually stir in the chocolate mixture. Pour into pie shell. Bake at 375 degrees for 40 minutes. Cool completely and serve.

xxx

Pumpkin Squares

Serves 15 to 18

2 cups pumpkin or 1 pound can
1 cup sugar
1 teaspoon salt
1 teaspoon cinnamon
1 teaspoon ginger
½ teaspoon nutmeg
1 cup chopped pecans, toasted
½ gallon vanilla ice cream, softened
36 ginger snaps

Combine pumpkin, sugar, salt, ginger, cinnamon and nutmeg, add nuts In a chilled bowl, fold pumpkin mixture into ice cream. Line the bottom of a 13 x 9 x 2 inch pan with half the gingersnaps, top with half the ice cream mixture, then another layer of snaps, add remaining ice cream. Freeze about five hours. Top with whipped cream and pecans.

xxx

Coffee Cake

½ cup butter
1 cup sugar
3 eggs
1 teaspoon vanilla
2 cups flour
1 teaspoon baking powder
1 teaspoon baking soda
1 cup sour cream

Cream butter, add sugar and eggs, beat well Add vanilla Add sifted dry ingredients alternately with sour cream. Use angel food pan, pour half the batter in and sprinkle all topping, add remaining batter Cut in like marble cake

Topping

¾ cup brown sugar
2 tablespoons flour
½ teaspoon cinnamon

(Continued On Page 27)

At Farmers National Bank of Quarryville, there are no checking charges of any kind. To anyone, of any age, anytime.

And no minimum balance is required, either.

Over the years, some pretty funny jokes have been made about bank advertising. About how hard it is to interpret the interest figures. About needing to read the fine print.

Well, rather than chuckle over the jokes, we've committed ourselves to offering the best rates and services, and then to explaining them in the clearest terms.

We consider it part of providing "banking the way you'd do it".

For instance, checking accounts. Some banks are offering no-charge checking to senior citizens. Other banks are doing it for young people. And a few banks say that everyone can check free, provided they maintain a balance of $300 or $500, etc.

So much for other banks. As for us, we're offering free checking to everyone, regardless of age or other considerations. And without any minimum balance.

At our bank, it's nothing new: we've been doing it for years. (Our only charge vaguely connected with checking is a small one for printing on special, personalized checks.)

So remember, at Farmers National Bank of Quarryville, there's free checking without conditions or qualifications. And it's available to you today. Period.

Farmers National Bank of Quarryville

Banking the way you'd do it.

Home on the Range

According to a quick glance at the calendar, it looks like Christmas is only a short five weeks away And, can it be, Thanksgiving is in less than a week? Most of us can remember that, as children, it seemed like the time dragged at a snails pace from Halloween until Thanksgiving, and almost screeched to a halt for that l-o-n-g time between Thanksgiving, and Christmas

One of the biggest labors of love for many of us in the weeks ahead is the special baking we'll want to accomplish The fruitcakes are being baked and seasoned, the cookies are being baked and frozen And how about making holiday candy? It seems there is never much of anything left when the holiday week arrives at our house Maybe there are little gremlins helping themselves in the wee hours of the night

We have been receiving numerous holidays recipes which we ll be presenting for your use Do others of you have some favorites to share? Maybe you have a special punch recipe, or snack idea, or something you do with cranberries, fruits — the possibilities are endless Send your recipes to Recipes, Lancaster Farming, Box 266, Lititz, Pa 17543, and receive a pot holder for use in your kitchen We are all looking forward to hearing from you!

Green Tomato Mince Meat

Chop 1 peck green tomatoes or put through coarse blade in food grinder Drain off juice and add as much water as there was juice Add 5 tablespoons brown sugar and 2 pounds raisins, chopped Cook slowly till tomatoes are tender Then add 2 tablespoons cloves, 2 tablespoons allspice, 2 tablespoons salt, 1 cup vinegar and 2 tablespoons cinnamon Boil about 45 minutes, stirring frequently Add 6 large sour apples, chopped

Mince Meat Cookies
(Using above Mincemeat)

1 cup shortening
3 cups sugar
4 eggs
1 cup sour milk
6 cups flour
2 cups mince meat
1½ cups chopped nuts
2 teaspoons salt
2 teaspoons soda
1 teaspoon nutmeg
1 teaspoon cloves
1 teaspoon cinnamon

Cream shortening Add sugar and eggs Sift dry ingredients and add to creamed mixture. Add milk, mince meat and nuts. Drop and bake, 375 to 400 degrees

"They brown nice and will stay soft"

Mrs M Zook
R D 2, Honey Brook

xxx

Persimmon Cookies

1 cup persimmon pulp, stir in 1 teaspoon soda
1 egg
1 cup sugar
½ cup shortening
2 cups flour
½ teaspoon salt

Add:

½ teaspoon cinnamon
½ teaspoon vanilla
1 cup chopped nuts
1 cup raisins

Drop on cookies sheets. Bake at 375 degrees about 15 minutes.

"I put persimmons through a colander These are very good cookies, somewhat like a fruit cookie"

Mrs David N Hoover
R D.2
Ephrata

xxx

Pizza Sauce
Makes 3 Quarts

2 large onions
1½ gal tomatoes, cut up
4 bay leaves
2 teaspoons oregano flakes

Boil this together until about one-half the amount, then put through fruit press and add·

1 teaspoon black pepper
¼ teaspoon red pepper
1½ teaspoons garlic powder
4 teaspoons salt
3 teaspoons sugar
¼ teaspoon chili powder

Bring to a boil and put in jars to seal, or put in freezer in desired amounts you wish to use

Mrs John O Stoltzfus
R D.1
Honey Brook

xxx

Pizza Pie

1 box hot roll mix

Mix 1 package yeast with 1 cup warm water (yeast comes with hot roll mix).

Blend yeast mixture and hot roll mix together. Then roll out on greased pizza pans Then make the following sauce:

1 quart tomato juice
1 tablespoon margarine
½ teaspoon oregano
½ teaspoon garlic powder
½ teaspoon salt
A little pepper
A little ground meat, if desired

Boil this mixture down to about 3 cups. Then pour on pizza pans and top with 2 cups grated white American cheese Bake at 400 degrees for about 25 minutes.

This makes two 12-inch round pizzas

Mrs Gideon Beiler
115 Horseshoe Road
Leola

xxx

Pizza Sauce

1½ quart tomato juice
1 cup chopped onion
1 teaspoon sugar
1 tablespoon garlic salt
2 tablespoons salad oil
1 teaspoon salt
Dash of pepper
Oregano and chili powder to taste

Bring to a boil and simmer 20 minutes, or until thick enough Add clear jell to thicken if desired.

"You can let the tomato juice stand overnight, then dip the water off That way it doesn't take so long to cook it thick"

xxx

Quick Refrigerator Ice Cream

4¼ cups whole milk
4 tablespoons plain gelatin
1 cup cold water
1¾ cups brown sugar
½ teaspoon salt
1½ cups whipping cream
Vanilla

Soak gelatin in cold water for a few minutes. Scald milk. Add salt and sugar and stir until dissolved. Add gelatin to milk and blend together. Cool. Add vanilla and pour into freezing tray Freeze until firm throughout. Remove from tray, about 3 hours, and put in a bowl. Christmas is only a short five weeks away. And, can it be, Thanksgiving is in less than one week? Most of us can remember that, as children, it seemed like Break up with spoon. Beat with electric mixer or rotary beater until free from hard lumps. Fold in whipped cream and return to freezing tray.

Makes about 8 to 10 servings.

Ellen H. Weaver

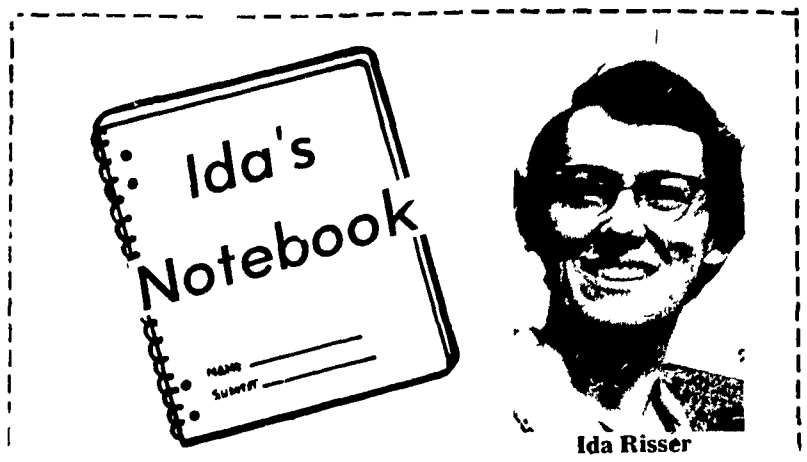
Self-Basting Turkey

Self-basting turkeys are usually U.S. Grade A birds Processors inject them with a limited amount (now three percent) of basting solution which is later released throughout the meat while the bird is roasting.

The solutions range from straight butter to mixtures of oil and water. The oils used are those normally found in margarine - cottonseed, soy, cocoanut or corn oil Basting solutions may also contain turkey broth plus added flavoring, preserving ingredients and antioxidants. USDA approves the solutions under regulations for Federally inspected turkeys.

Last year one-third of the nation's turkey crop was processed and marketed as self-basters. While they can be more convenient, these birds may also cost more per pound. In addition the three percent of basting material injected is included in the total weight of the bird and costs the same per pound as the meat. It's your decision.



Ida Risser

November is a bleak and dreary month in my book and we need to try hard to fill it with pleasant things.

Our first son was born the beginning of November and I still remember returning home with him about a week later and being shocked by the change in the trees. They changed from colored foliage to no foliage and stood dark and bare Of course, he kept me busy that winter

Now on a rainy, dismal day I find small jobs to keep me busy First the fish bowl must be cleaned, then a new binding put on the wool blanket, the baskets of apples turned into applesauce, and I take time to stamp some flowers on a piece of homespun linen for a bureau scarf.

Playing records on the stereo given by that first son - now grown - helps to dispense the gloom of a gray November day and brighten my mood

xxx

During the past few years, I've visited folks in many rest homes over the County. They range from elegant to adequate to almost dilapidated structures

Recently, on behalf of my church, I visited a home for elderly folks to ask if they needed anything. The answer was negative. Last year we supplied clothes of various sizes for them. If they had asked for money or food, I'm sure we would have tried to supply it.

However, there was one thing I felt they needed and it is the one thing we are least willing to give I'm thinking of our "time" It was appalling to see the apathy of the men and women They appeared listless and indifferent as we could find no common interests Only a few had a hobby to pursue and were willing to talk about it

When these people were 20 or 30 years younger, were they active? I really don't know, but I believe contact with outsiders would improve their outlook

Farm Women Societies

Society 6

Farm Women Society 6 met at the home of Mrs. Emory Wolgemuth, Elizabethtown RD3 Saturday. The speaker for the meeting was Miss Reba Sebelist, who is working with the mentally and physically retarded.

The society voted to donate $20 to the Needlework Guild and $20 to the United Campaign.

Hostesses were Mrs. Wolgemuth, Mrs. Lester Breneman, Mrs. Paul Hess and Mrs Clayton Hollinger.

Society 9

Farm Women Society 9 members recently packed 30 baskets of fruit during a meeting at the home of Mrs. Wilbur Heller, Conestoga Rd1. The fruit was donated by members and distributed to area shut-ins.

Mrs. Eli Harnish, Mrs. Frank Reighard and Ida Wiegand were assisting hostessses. Mrs. Clyde Dunkle led devotions based on a Thanksgiving theme.

During the business portion of the meeting, a gift of $25 was approved for the Ann Lawrence fund Miss Lawrence is a Conestoga area young woman who is presently undergoing expensive rehabilitation in a Reading hospital as a result of a one car freak accident on Wabank Road last June.

Twenty-four pieces of clothing and $26 was collected for the Needlework Guild Ingathering to be held at the Iris Club on Tuesday

Tentative plans to assist in the preparation of toys for the Toys for Tots Christmas Shop at the Lancaster Boys Club was set for the week following Thanksgiving.

Plans were also set for members and friends to tour homes on the Holly Trail, sponsored by the AAUW. Cars will meet at the Lancaster Shopping Center at 1:30 p.m.

Nine members will accept the invitation from Provident Book Store to attend an autograph luncheon introducing "Food for Fellowship," a cook book written by Antoinette Hatfield, wife of Senator Mark Hatfield of Oregon, on December 1 at Lancaster Holiday Inn North.

Literature was distributed by the Cancer Society inviting women to participate in a free clinic, offering the pap test in a program aiming to have every woman in the United States tested by 1976. Society 9 has a continuing project of preparing cancer dressings.

GET THROUGH THE FIELD FAST AND FINISH FIRST

. . . WITH AN ALLIS-CHALMERS TWO-WAY PLOW

THERE'S no faster way to plow through the field than with an Allis-Chalmers two-way. Fast hydraulic roll-over cuts turn-around time at the end of the field. Big 16-inch bottoms turn the widest, deepest furrows you've ever seen. High clearance keeps you going non-stop through heavy trash.

Plow your fields fast, deep and level with an Allis-Chalmers two-way plow. You won't have to wait for big harvest yields to see why GOING ORANGE IS GOING GREAT!

Women Societies

(Continued From Page 24)

Husbands will be guests at a Christmas party to be held December 7 at 6:30 p.m. at the Akron Restaurant. Each person attending will bring a gift to exchange among each other and a towel for the Lancaster Boys Club.

The program will be announced by Mrs. Paul Zercher.

Society 13

Farm Women Society 13 met recently at the home of Mrs Robert Sayres, Witmer, with Mrs. Eugene Hummel serving as cohostess. Mrs. Hummel, president, presided at the meeting.

A new member, Mrs. Paul Gehman, was voted into the Society. Members voted to contribute $10 to the United Fund Campaign Six members will attend the Homemaker's Christmas program on November 28 at the Farm and Home Center.

Speaker at the meeting was Eugene Hummel, guidance counselor at McCaskey High School, who spoke on "The Role of a Counselor."

The next meeting will be a family Christmas party at the Ronks Fire Hall to be held at 6:30 p.m. December 9. Mrs. Harry Zook will serve as chairman of the ways and means committee and Mrs. William Schroeder will serve as chairman of the program committee.

Society 14

Farm Women Society 14 members were entertained recently at the home of Mrs. J. Clarence Groff, Strasburg RD1 Mrs. Groff was assisted by Mrs. Ira Rutt, Mrs. Clarence Herr and Mrs. Leon Thomas.

Paul G. Wedel, president of Lancaster General Hospital, was guest speaker. He spoke about the work at the hospital.

Society 14 will hold a bake Sale November 18 beginning at 10 a.m. in the Park City Mall.

The Christmas Banquet will be held at 6:30 p.m. December 14 at Good 'n Plenty Restaurant. Miss Mary Atzinger will provide the evenings entertainment.

Farm Women Society 14 met at the home of Mrs. John Ferguson, Unionville, with Mrs. Park Reinhart as cohostess. The president, Mrs. Joseph Best, presided Dovotions were led by Mrs. Ferguson

A $25 donation was given to flood relief and a contribution to Christmas Seals. At the annual Christmas party December 9, members will bring a toy wrapped and designated "boy" or "girl" which will be sent to Wilkes-Barre and given to children for Christmas.

Mr and Mrs William Gross, Quarryville, will show slides of their recent trip to New Guinea at the Christmas party

Miss Donna Hackman, Willow Street, is the contestant the Society is sponsoring in the Miss Solanco Pageant November 25 at Solanco High School

After a covered dish luncheon the group motored to Avondale where they visited the Bottle Shop of Smedley Thomas

Society 22

Farm Women Society 22 members were entertained by Mrs Harold Zook who showed slides of a trip to Alaska which she and her husband took last September at a meeting held at the home of Mrs Elvin Sangrey

Mrs Lloyd Herr, cohostess, led devotions and gave a reading on Thanksgiving

During the business meeting it was decided that each member will give a donation for the Anne Lawrence Fund instead of exchanging Christmas gifts A donation of $25 was sent to the Christian Children's Fund for Christmas gifts for the Society's adopted daughter and her family in Guatemala A donation of $50 was given to a family who recently suffered loss from a fire in their home

A report of the County Convention was presented by Mrs Amos Miller Mrs Willis Zodet was welcomed into the Society as a new member and was installed by the president, Mrs Jay Landis.

The following members volunteered as delegates to the State Convention to be held January 8 and 9 in Harrisburg Mrs Jay Landis, Mrs Henry Hess, Mrs Lester Landis, Mrs Carl Diller, Mrs Wilmer Andrew, Mrs Clarence Rohrer and Mrs William Weller

Some of the members will attend the meeting at the Holiday Inn North at Noon on December 1 when Mrs Mark Hatfield will give a talk on Food for Fellowship, sponsored by the Provident Book Store The Holly Trail on December 2 and 3 will also attract some of the members

Mrs Edward Bloom will demonstrate "How to do it for Christmas" at Homemaker's Day which will be held Tuesday November 28 at the Farm and Home Center Society 22 will participate with a display table of Christmas crafts, decorations and ideas In the morning there will be demonstrations by local women and a talk on Fire Prevention by Ernest Warner

Society 25

Farm Women Society 25 members met at the home of Mrs Jacob Boose, Conestoga, for the November meeting to sew cancer pads Mrs Paul Roland led devotions

During the business meeting Mrs John Metz, president, reported that one of Society 25's members, Mrs Sterling Eimer, was elected to serve as secretary of the Lancaster County Farm Women

It was also reported that 11 members went ot the County Convention at the Lancaster School of the Bible

The next meeting will be a family Christmas party, a covered dish supper, at Shady Maple Building Willow Street RD1, on December 9 at 6 30 p m

Homemaker's Holiday Meeting

The Chester County Extension Service announces a Homemaker's Holiday Meeting to be held from 10:30 a.m. to 2:30 p.m. on Tuesday, December 5 at the Elverson Fire Hall.

Included on the program will be a panel consisting of Mrs. Carol R. Rothermel, assistant Extension home economist, and representatives of the Consumer Protection Bureau, retailers, and consumers, who will discuss "Consumer Rights and Responsibilities". Other features for the day will be "Innovative Gift Wrapping" with Martin Swarr, and a "Trash to Treasure Idea Exchange", where everyone is invited to display a Holiday decoration made from a throw-away package or other disposable material.

Reservations deadline date is Monday, November 27. For further information, contact the Chester County Extension Service, 402 North Wing, Courthouse, West Chester, Pa. 19380.

The Original... and still best

Over 20 years ago, Wayne introduced Tail Curler Pig Starters to the swine industry and took much of the work and worry out of starting and weaning pigs.

Wayne Pre-Starters are rich in natural milk products and other sweet-tasting, palatable ingredients that appeal to baby pigs. All three Tail Curlers, Tail Curler Rockets . . . Tail Curler Junior and Tail Curler Pig Starter, contain the ideal balance of essential ingredients and move gently through his delicate undeveloped system, easing him into solid food the "natural" way.

The Wayne Pig Starting Program offers the "difference" that comes only with experience. Tail Curlers were good 20 years ago . . . 20 years better today.

Trees for Christmas

(Continued From Page 21)

2 tablespoon butter
½ cup nuts
Bake at 350 degrees for 35 to 40 minutes.

xxx

Red Beet Chocolate Cake

1 cup salad oil
1½ cups chopped beets
1½ cups sugar
3 eggs
2 squares chocolate, melted
1¾ cups flour
1½ teaspoons soda
½ teaspoon salt
1 teaspoon vanilla.

Blend oil and beets in the blender. Cream together with sugar, eggs and chocolate. Add sifted dry ingredients and vanilla. Bake at 350 degrees, 20 to 25 minutes for layers. Stays soft.

Fudge

¾ cup undiluted evaporated milk
2¼ cups sugar
1 (12 oz.) pkg. chocolate bits
1-3 cup white Karo syrup or honey
2 tablespoons butter or margarine
1 teaspoon vanilla

Combine milk and sugar in heavy sauce pan. Cook over medium heat, stirring constantly, till it boils. Turn heat low. Cook 10 minutes, stirring. Remove from heat, add chocolate, Karo, butter, vanilla at once. Stir until creamy. Pour in buttered pan. Chill in refrigerator for two hours. Cut in squares. Nuts can be added.

xxx

Cheese-Crab Souffle

Serves 6

½ lb Old English cheese, cubed
4 slices bread (remove crust), cube
3 eggs, well beaten
½ pt. half and half cream and milk
¼ cup melted butter
1 can crab meat (drain)
1 small can mushrooms

In a two quart casserole layer bread, half of the cheese, mushrooms, crab meat, cheese. Mix milk, eggs and butter. Pour over casserole and place casserole in a pan of water. Bake at 350 degrees one hour. Serve at once.

xxx

Italian Tomato Dressing

½ cup oil
1-3 cup cider vinegar
1 (8 oz.) can tomato sauce
½ teaspoon salt
2 tablespoons sugar
1 teaspoon dry mustard
1 teaspoon paprika
½ teaspoon oregano
2 teaspoons Worcestershire sauce
½ clove garlic, finely chopped
2 teaspoons finely chopped onion
1 tablespoon finely chopped celery
2 tablespoons salad dressing

Blend for 15 seconds on high or beat in mixer

xxx

When it comes to flowers, Mrs Sahm has 14 flower beds which includes an herb garden Some of the herbs she grows are summer savory, winter savory, sasil thyme, rosemary, tarragon, sage, parsley, three kinds of chives, sweet cicily, dill and fennel. Some kinds of teas she grows are lemon mint, curly leaf mint, apple mint, spearmint, curly mint, peppermint and she also uses sage as a tea She freezes some herbs and dries some. She has five books on herbs

She has several peonies at the end of their lane. Sahms have a row of arborvitae trees along one side of their lane and many ornamental evergreen and flowering trees on their lawn One unusual tree they have is a Cedar of Lebanon

Mrs. Sahm has all kinds of flowering bushes, ten kinds of iris, tulips, daffodils, narcissus, large and small dahlias, gourds gladioli, tuberose, geraniums, eight kinds of impatiens, name it and she has it. She raises pop corn and has a vegetable garden She has 70 potted flowers in her basement this winter and many more on her window sills on the first floor of their home She says "I give them away, that's really the joy of having them " She sets all of her houseplants out in the ground in the summer, even African violets.

She makes floral arrangements. She worked at Barr's and Wissler's flower shops before she was married so she has had lots of experience.

Mary makes beautiful wool braided rugs She made a 9 X 12 for their den and calls it her sentimental rug. She can tell you where each kind of material came from She made Kathy a 6 X 9 rug and Georgette a smaller one She is now making one for Michael.

She made two oil paintings for herself and one for each of her children. She started to collect bottles and has loads of them Some too are quite old She has several pieces of antique furniture such as a sofa, chairs and tables Unusual ones are six three-legged chairs They fit in nicely around a table

Another of Mrs Sahm's hobbies is reading She loves to read biographies

Ayrshires Complete Official Records

Official records completed by local Registered Ayrshires were announced recently by the Ayrshire Breeders' Association Brandon, Vt

In the Masonic Homes Farms herd, managed by James Horton Elizabethtown, a senior-four year-old named Masonic Homes Lo Betsy completed an official milk production record of 18,690 pounds of milk, 849 pounds of butterfat on twice-daily milking for 305 days Betsy's record is 1¾ times the national average for all dairy cows

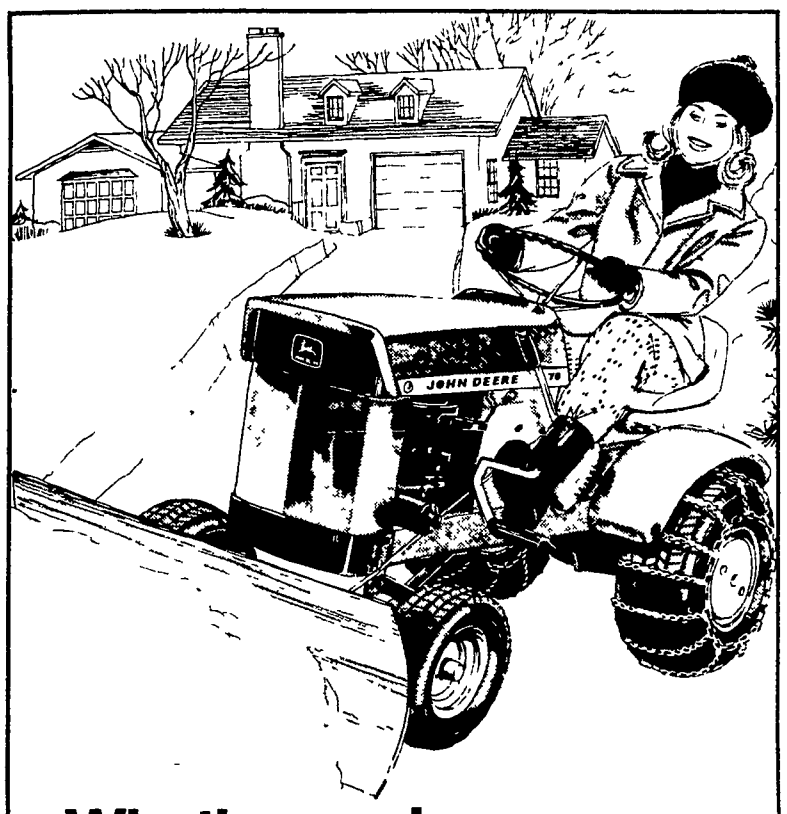
A six-year-old in Charles H Gable's Conebella Farm herd Elverson, Conebella Wheel's Girl completed an official milk production record of 14,200 pounds of milk, 617 pounds of butterfat in 305 days Girl's record is 1½ times the national average for all dairy cows

Also named in the Masonic Homes herd are the following cows and their records

Masonic Homes Ninah B, J-4, 16,800 pounds of milk, 696 pounds butterfat, Masonic Homes Miss Prim, J-3, 15,570 pounds milk, 634 pounds butterfat, Old Acres Samson's Betty, 5-7, 15,220 pounds milk, 632 pounds fat, Wauwatosa's Flashy Gertie, J-4, 15,150 pounds milk, 601 pounds fat, Masonic Homes Hianna, J-3, 14,920 pounds milk, 618 pounds fat, Masonic Homes Miss Count, J-3, 13,070 pounds milk, 539 pounds fat, Masonic Homes Jennifer, J-3, 13,030 pounds milk, 555 pounds fat, Masonic Homes Cora Jane, 10-1, 12,990 pounds milk, 558 pounds fat, and Masonic Homes Flashy Betsy, J-2, 12,790 pounds milk, 561 pounds fat

It's the Berries

Strawberries have more vitamin C than an equal quantity of lemons and one handful of fresh strawberries supplies an adult's daily need of vitamin C and more vitamin A than the same weight of raisins



What's your lawn mower doing this winter?

When the snow flies, your mower goes into hibernation. But not a John Deere Lawn and Garden Tractor. It earns its cold-weather keep two ways Either with a snow blower that takes a 32- to 46-inch bite and throws it 20 feet or with a blade that clears a 30-foot drive in minutes. "Winterized" Weekend Freedom Machines come in 7- to 14-hp sizes, stick or automatic See us about one soon We also provide financing

DOUBLING THE FARM DEBT

Farmers are expected to drive up outstanding farm debt to $107 billion in 1980—double the 1970 mark

This projection by a Federal Reserve Board economist, writing in the July issue of ERS's **Agricultural Finance Review**, is based mainly on the growing costs of farm inputs.

According to the economist, records for each of the major uses of capital (machinery, buildings, land improvements, money balances, and inventories of crops and livestock) reveal that during the last 2 decades there has been relatively slow growth in most items in constant prices, and an actual decrease in some items. On balance, the capital flows—farmland transfers and other outlays—rose because price increases drove up the cost of expenditures

One of the larger capital flows is the purchase of farmland from retiring farmers and nonfarm heirs This capital need is directly related to farmland prices Land prices are expected to climb nearly 4 percent a year, based on projected rates of general price inflation and a decrease in farm numbers. By 1980, $6 billion a year may be required to transfer farmland not directly inherited by farmers, compared with less than $4 billion in 1970

Machinery purchases are the other big expenditure, accounting for around $5 billion annually in recent years Most goes to replace wornout or obsolete machinery, since net additions to existing stock are small But with projected annual price increases of nearly 3 percent, farmers would be spending over $8 billion a year for machinery by 1980.

Expenditures for buildings and land improvements are projected at around $1.5 billion in 1980, about the same as currently The cost of net annual additions to financial assets and to inventories of livestock and stored crops may average about $800 million by 1980, compared with less than $500 million during 1950-70. Of that amount, additions to livestock inventories are projected to use $200 million annually.

Summing all these items, farmers' total annual capital flow is expected to reach $16.7 billion by 1980—up more than 50 percent from 1970.

Farmers pay for these capital expenditures either out of their own pocket or by borrowing. If farmers use the same share of their income this decade as in the 1960's, out-of-pocket spending would account for about 60 percent of the projected capital flow.

Borrowing for the remainder will cause outstanding debt to rise nearly 7 percent a year in the 1970's—reaching the $107 billion total by 1980. This is less than the 9-percent growth rate in farm debt during the 1960's.

Examination of credit supply factors at major farm lender groups led the economist to believe that the projected credit demands can be easily met by lenders.

For example, if land prices rise as projected, causing the cost of farmland transfers to increase, sellers of farms will also be relatively better able to "invest" sizable funds in farm mortgages or land contracts.

However, life insurance companies may tend to move in and out of farm lending due to variations in their supply of funds and in the profitability of farm loans relative to other investments.

Rural banks, though faced with similar fund supply and profitability conditions, have a long-run incentive to favor local lending. Future deposit growth at rural banks could match the projected 7-percent annual rise in farm credit demands.

But individual rural banks are unlikely to grow as fast as credit use per farm—projected to rise 145 percent during this decade. As a result, some rural banks may seek increased lending capacity through merger or by affiliation with holding companies.

Other important farm lenders include Federal land banks, production credit associations, the Farmers Home Administration, large banks, and farm supply and equipment corporations. They obtain part or all of their loanable funds in the national money market.

Because the money market is an elastic source of funds for agriculture, these lenders can assure an adequate supply of credit to farmers—even if farm credit demands run higher than projected—provided that farmers pay the going market price for these funds. Too, these lenders can fill in the gaps at times when others reduce their farm lending.

Oldest Tree Food

Walnuts are the oldest known tree food used by man. Shells of walnuts were found in the Swiss Lake dwellings of Neolithic man, dating from about 7000 B.C.

FEED LETTER

A PINCH OF BAKING SODA!

Sounds like I'm fixing to whip up a cake, but I'm really talking about your cows. Just like a cake, it takes a pinch of baking soda, or sodium bicarbonate to your budding animal nutritionists, to get the top performance out of a cow. Normally she takes care of this matter herself by secreting saliva which contains the magic ingredient. However, when the dairymen insists on feeding feeds which go down the pipes with a minimum of saliva needed and containing a goodly percent of acids, poor bossy may be headed for digestive upset.

No need to panic if you see the symptoms, such as poor appetite and cuds laying in the feed maneger, just grab your friendly feed man by the scruff of the neck and demand a quick solution. He ought to know what to do.

KINDA MAKES A BODY WONDER, DON'T IT?

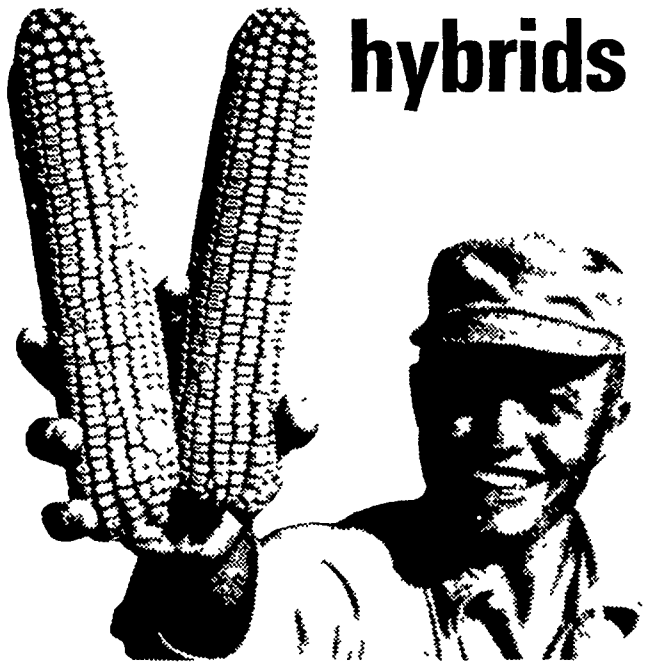
Plant Pioneer "Leader" hybrids



EARLY MATURITY:

3773 - Most popular hybrid in it's maturity in Pennsylvania.

MEDIUM MATURITY:

3518 - Excellent standability - dries down fast and produces deep kernels on a small cob.

3571 - Top yielder of quality corn. Keeps standing till harvest.

FULL MATURITY

3368 - Excellent companion to 3369A - has many of the same characteristics plus better standability.

3369A - Frequently 10 to 20 bushels per acre better than other corns.

Sold by your Pioneer man

Farm-City Week

Local men and women can exercise a key role in governing the way in which they wish to improve our quality of life, County Farm-City Week Chairman M.M. Smith said today.

But to exercise this role in decision making, he points out, they will need to be well informed about our environment, their relationship to it, and the various alternative uses available with due regard to proper conservation and other safeguards needed to accompany those uses.

Farm-City Week, being observed November 17-23, is a time both rural and urban people should take a long, hard look at the problems of our environment and think about ways of managing our surroundings which will be beneficial to all area residents.

Smith exphasizes that we must answer several fundamental questions which will affect our health, happiness, and strength of community life in our decision making processes:

- How pure can we afford to have our water?
- How much pollution may be economically desirable?

To what degree should sediment be stopped?

A serious element is that every eight seconds a new American is born. That person in his expected 70-year life span will demand 26 million tons of water, 21,000 gallons of gasoline, 10,000 pounds of meat, and 28,000 pounds of milk and cream.

Multiply these figures by the estimated population growth of an additional 100 million people by the turn of the century and we have significantly increased production goals to meet.

Can we increase our food production without the products and services provided by the processes that casue pollution?

"What we need to solve the problems of our environment is a system that will allow for a sensible balance between product and by-product. Through this we can provide the things we need for life without endangering it," Smith said.

Change of Address

Every year about one-fifth of the people in the United States change their residence, with one out of six of them moving to another state.

Holstein Assoc. Honors Youths

Roy Hoppes, a 19-year-old Berks County youth, was named one of two Distinguished Junior Members by the Pennsylvania Holstein Association at that organization's annual meeting in Willow Grove last night. The other Distinguished Junior Member was Melodee Levan from Milton.

David Herbert, Kutztown, was one of four semi-finalists in the state-wide competition for the association honors.

Roy is the son of Mr. and Mrs. Morris Hoppes, Hamburg R2. He owns 25 registered Holsteins, and has been an active 4-H and HFAA junior member for the past nine years.

An active FFA member for the past five years, Roy held several offices on the local and county level, has been state FFA vice-president, won the Keytsone Farmer Degree in 1971, and attended the 1972 National FFA Leadership Training Conference.

A 1971 graduate of Hamburg Area High School, Roy is now a full-time dairy farmer

Eggmen

(Continued From Page 1)

of Egg Clearinghouse, Inc.; Dr. Anthony Stemberger, professor of agricultural economics at Penn State and a member of ECI's egg pricing research committee.

Pickler postulated that the correct egg price is the highest price that will move the existing supply of eggs.

A producer in the audience took exception to this definition, saying that the correct price should be one which will guarantee a profit to the producer. "The packers, the brokers and the retailers have the producer on the bottom all take their profits from the top, and the producers get what's left over," he said. "We ought to start figuring egg prices from production costs."

Pickler said there was no way to guarantee the cost of production in a free market. He said that if producers produce too many eggs, then the prices will go down There seemed to be a general consensus among the resource people, in fact, that limiting production was the only real way to control egg prices.

Determining exactly what the egg price is came in for a lot of discussion at the meeting. Nest run eggs is one of the most important concepts developed recently in this area, Pickler said

The problems and the promise of Egg Clearinghouse, Inc (ECI) were discussed at length by Stemberger and Pickler They said that ECI could become an important element in the egg price discovery system, but only if egg dealers use its facilities as a part of their normal operations

Soybean Meeting Slated by Garden Spot Young Farmers

The Garden Spot Young Farmer monthly meeting will be held at 7 45 p m Tuesday evening, November 21 in the Garden Spot High School vo-ag classroom The topic for the November meeting will be Soybeans The speaker will be Dr Richard Cole, research agronomist from Penn State University, who will be discussing recommended growing practices for raising soybeans, a crop that is becoming more and more popular in this county

The Young Farmer Chapter, in cooperation with the FFA Chapter at Garden Spot High School, recently completed a study of the effect of row width on yield and the results of that study will be summarized and analyzed at the meeting

In connection with the Young Farmers study on Soybeans, the group took a field trip to Mark Hershey's processing facilities near Annville The purpose of the trip was to learn more about the feeding of the beans local farmers are producing

Any farmer in the area who is interested in more information about raising or feeding soybeans is welcome to attend either of these meetings For further information contact Donald Robinson, Adult Farmer advisor, at Garden Spot High School

Served Long Term

Cordell Hull, who was described by President Franklin Roosevelt as the "father of the United Nations," served as secretary of state for nearly 12 years, which was longer than any of his predecessors

Kerry Boyd (center) was named grand champion exhibitor at the Lincoln 4-H Club Capon Roundup this week, while Gaile Gehman (right) had the reserve champion bird. Kermit Birth (left), Penn State Pountry Marketing Specialist, served as judge for the annual event.

Appropriate trophies are displayed in front of the winning pairs this week at the annual Lancaster County 4-H Capon Roundup. Shown left to right are: Glenn Miller, agriculture chairman for the Lancaster Kiwanis; Mike Peifer with his grand champion pair; Tod Herr, reserve champion pair, and Dr. Owen Keene, Penn State Poultry Nutrition Specialist who served as judge.

Lincoln 4-H Capon Roundup Champion Captures $7.40 Tag

A ten pound capon sold for $74 at the Lincoln 4-H Community Club Capon Exhibit Wednesday night at the Ephrata Legion Hall, sponsored by the Ephrata Rotary Club.

The grand champion bird exhibited by Kerry Boyd, Ephrata RD1, sold for $7.40 per pound. The nine-and-one-half pound reserve champion which sold for $3.05 per pound was exhibited by Gaile Gehman, Denver.

There were 18 birds sold to Rotary Club members, averaging $1.79 per pound. This price is about $1 above market price Wilbur Hossler, Lititz, was auctioneer.

Other winners included: Barry Weitzel, Denver, third; Tessie Gehman, Denver, fourth; Deborah Weitzel, Denver, fifth, and Steve Gehman, Denver, sixth.

Kermit Birth, Extension Poultry Marketing Specialist from Penn State University, served as judge as well as dinner speaker

The Ephrata Rotary Club sponsors this event annually Club members buy the capons which are sold to the highest bidder

Each year the outstanding Capon project in the Lincoln club is recognized with a large trophy Scoring of this competition is based on all aspects of the project including management, recordkeeping, 4-H story and the exhibit. This year Kerry Boyd received the trophy

Lancaster Kiwanis Club members were buying holiday capons Tuesday night at the 1972 Lancaster County 4-H Capon Roundup from industrious 4-H Club members. The event is sponsored annually by the Lancaster Kiwanis Club.

Both the top winners came from the Manheim RD1 area. Mike Peifer exhibited the grand champion pair while Tod Herr had the reserve champion pair. Peifer's ten-and-one-half pound capons were sold for 85 cents per pound.

There were 13 exhibitors competing in the show. Other top winners were: Stanley Miller, third; Doris Hershey, fourth, and Linda Hershey, fifth. These winners were all from Lititz.

Dr. Owen Keene, Penn State Poultry Nutrition Specialist, was judge. He also spoke at the luncheon. The title of his speech was "How Nutrition has Increased Efficiency and Reduced Prices of Poultry Meat and Eggs to Consumers."

In total project competition Mike Peifer was first with Stanley Miller second.

Kiwanians furnished the trophies for the champions as well as prize money.

National FFA V-P Planning Week Here

Bruce S. Erath, a national FFA vice-president, will be spending a week in Lancaster County as part of a training program for new FFA officers, according to Dr. Robert Herr, head of vocational agriculture for the Eastern Lancaster County School District.

Herr said that Erath is expected to arrive in New Holland on November 27 to spend a week talking to FFA members, chapter advisors and local farmers and agri-businessmen He will be the guest speaker at the Lancaster County FFA meeting on November 30 at New Holland.

This is when you get that good feeling

This is pay day.

This is when it all comes back.

The fertilizer. The seed. The interest. The machinery. The thinking. The *work.*

With a profit, if all the inputs did their jobs.

The *seed* is a key. Some hybrids have a superior capacity to produce. To give you *more* corn, from the *same* soil and season.

Profit-minded corn growers have learned Funk's G-Hybrids can be depended upon to do just that. To produce top yields. Year after year. Dependably. In good seasons and—like many years—when conditions are tough at critical times.

Year after year, corn growers with Funk's-G at work in their fields have that *good feeling.*

That good feeling you get when you have dependable hybrids, from dependable people. Funk's G-Hybrids.
